## UVOD

Ministarstvo mora, prometa i infrastrukture početkom 2007. pokrenulo je projekt vizualnog označavanja otočnih proizvoda oznakom "Hrvatski otočni proizvod" s namjerom poticanja otočnih proizvođača u proizvodnji izvornih i kvalitetnih proizvoda.

Uvažavajući Nacionalni program razvijanja otoka i Zakon o otocima projekt je pripreman nekoliko godina. Temeljni je cilj da se identificiraju i distribuiraju kvalitetni otočni proizvodi koji će kao takvi biti prepoznati i u Hrvatskoj i izvan nje. Radi se o proizvodima koji su rezultat otočne tradicije, razvojno-istraživačkog rada, inovacije i invencije čija razina kvalitete mora biti mjerljiva. Oni potječu s ograničenih otočnih lokaliteta i rade se u malim serijama.

Odluku o dodjeli oznake donose neovisne tehničke komisije čiji su članovi priznati hrvatski stručnjaci za relevantna područja. Oznaku mogu dobiti proizvodi koji udovoljavaju svim propisanim uvjetima. Konačnu odluku donosi Savjet projekta.

Budući da se oznaka "Hrvatski otočni proizvod" dodjeljuje već petu godinu za redom (u katalogu su prikazani proizvodi kojima je oznaka dodijeljena u 2007., 2008., 2009., 2010. i 2011. godini) namjera pokretanja ovog projekta u cijelosti je ostvarena. Otočni proizvođači potaknuti su da kroz samozapošljavanje stvaraju proizvode natprosječne kvalitete i ostaju na našim otocima, a potrošači su se susreli s novim proizvodima u čiju su se izvrsnost već uvjerili.

Oznaku kvalitete "Hrvatski otočni proizvod" do sada je dobio 100 otočnih proizvođača s 20 hrvatskih otoka za 252 proizvoda/proizvodne linije.

## FOREWORD

In early 2007, the Ministry of the Sea, Transport and Infrastructure initiated the project of visual labelling of island products with the label "Croatian Island Product", with the intention of providing an incentive for island manufacturers of authentic and quality products.

Taking into consideration the National Island Development Programme and the Islands Act, the project's preparation took several years. The basic goal is to identify and distribute quality island products, which will then be recognised as such within and outside Croatia.

These are the products manufactured as a result of island traditions, research and development, innovation and inventiveness, whose level of quality must be quantifiable. They originate from limited island sites and they are manufactured in small series.

The decision on the award of the label is left up to the independent technical commissions, whose members are well known Croatian experts in corresponding fields. The label may only be awarded to products that satisfy all of the prescribed requirements. The final decision is made by the Project Council.

"Croatian Island Product" label has been awarded for the last five years (the catalogue features winners of 2007, 2008, 2009, 2010 and 2011) which proves our intention, concerning the project, is fully accomplished. Self employed island manufacturers have been encouraged to stay located on the islands and produce the highest quality products, while the consumers got the opportunity to taste the excellence of their newest products.

The label of quality for the "Croatian Island Product" has been rewarded to 100 island manufacturers from 20 Croatian islands for the total of 252 products.

## RIJEČ MINISTRA

Božidar Kalmeta

Privilegija je raditi i skrbiti za otoke. Svatko tko je posjetio makar i najmanji škoj našeg prelijepog Jadrana mora očutjeti sreću biti i djelovati na tim malim kontinentima. Mi, koji smo godinama u priči od 1.244 otočnih bisera, postali smo zatočenicima ljestve "grljene mirisom i soli, posutih zemljom uvijek žednom".

Na žalost, ne osjećamo svi jednako blagoslov života na ovim prostorima. Posljednjih desetljeća se prirodnu i kulturnu baštinu više gazi, razgrađuje i zaboravlja nego čuva, a sklad autohtonog i novog je ozbiljno poremećen. Problem je vrlo složen i ne možemo i ne želimo ga vezati samo za hrvatske otoke. Međutim, posljedice poremećaja na malim, osjetljivim prostorima su vidljivije i devastacije su veće, a šteta često nesaglediva. S druge strane, proces globalizacije je nezaustavljivo krenuo i mi se često i sa pravom bojimo da će nas "progutati" veliki, bogati svijet.

Iz želje da sačuvamo samu esenciju otoka i otočana nastala je priča ljubavi koja nosi ime projekt "Hrvatski otočni proizvod". Projekt "Hrvatski otočni proizvod" namijenjen je poticanju razvoja otočne proizvodnje i podizanju razine kvalitete otočnih proizvoda koji bi morali uključivati značajke otočne tradicije, razvojno-istraživačkog rada i inovacija, te promociji hrvatskih otoka kao područja od posebnog interesa za Republiku Hrvatsku. Cilj je pozicioniranje kvalitetnih proizvoda na domaćem i stranom tržištu. Europska unija pridaje veliki značaj proizvodnji tradicionalnih proizvoda (vezano uz poticanje ruralnog razvoja), a na području hrvatskih otoka postoji veliki broj autohtonih, visokokvalitetnih proizvoda koji mogu postati značajan izvozni brand.

Svaki otočni proizvod je malo umjetničko djelo satkano od najfinije čipke stoljećima građenog mentaliteta i svjetonazora koji u svojoj srži čuva tradiciju nacionalnog identiteta. Nakon pet godina možemo se pohvaliti zavidnim brojem vrsnih proizvoda koje nose oznaku "Hrvatski otočni proizvod". Tu su vina kojih se ne bi posramile najbolje svjetske vinoteke s lokaliteta od Korčule do Krka, od postupa, plavca, grka, rukatca, vugave do žlahtine, otočne delicije poput viškog hiba, cukarina

s Korčule ili rapske torte koja je služena velikodostojnicima. O sirevima, limončelu, ribama, motaru, baškotinu, medu, džemovima, maslinovom ulju, rakijama i likerima, ... nije potrebno govoriti – trebate ih kušati.

Na kraju, nemojte zaboraviti ni naše nejestive proizvode: sapune i ulja za tijelo, proizvode od creske vune, bračkog kamena ili pašku i hvarsку čipku. Upalite svijeću u svijećnjaku od bračkog kamena, obucite tople papuče od creske vune i kušajte proizvode s oznakom "Hrvatski otočni proizvod". Svaki okus Vas kao u bajci vrati na otok i čujte miris smilja, kadulje, osjećate kapljice mora na licu, vidite sunce u očima...živite otok.

**MINISTER**

Božidar Kalmeta

It is a privilege to work and to care for islands. Anyone who visited even the smallest island in our beautiful Adriatic Sea must have felt the joy of living and working on those small continents. We, who have been a part of the story of 1,244 island pearls for years, became prisoners of a beauty *embraced by the scent and the salt, sprinkled by ever-thirsty soil.*

Unfortunately, not all of us are equally blessed to live in these areas. During the last decades, the natural and cultural heritage has been more treaded on, disintegrated and forgotten rather than preserved, and the harmony of the autochthonous and the new has been seriously disrupted. The problem is very complex and can not and will not be related only to Croatian islands. However, the results of imbalance in small, sensitive areas are more visible, the devastation greater, and the damage often immeasurable. On the other hand, the process of globalization is unstoppable and we often fear with every right that we will be "swallowed" by the large, wealthy world.

Due to the desire to preserve the essence of our islands and islanders, emerged a story of love entitled the "Croatian Island Product". The intention of the "Croatian Island Product" Project is to stimulate and develop the island production and to improve the quality of the island products, which should incorporate the characteristics of island tradition, research, development and innovation, but also the promotion of Croatian islands as areas of special concern to the Republic of Croatia. The goal is to introduce quality products to domestic and foreign markets. The European Union pays great attention to the manufacture of traditional products (in relation to the stimulation of rural development), and on Croatian islands there are numerous autochthonous, high-quality products which can become a significant export brand.

Each island product represents a small piece of art woven from the finest lace of multacentennial mentality and life philosophy, which guards the tradition of national identity. After five years, we can take pride in an enviable number of excellent products bearing the label of the "Croatian Island Product". There are wines which would make even the best wine stores proud, coming from the localities extending from the Island of Korčula to the Island of Krk, such as Postup, Plavac, Vugava, Grk, Rukatac and Žlahtina, island delicacies such as hib from the Island of Vis, the Korčula cukarin, or the Rab cake which was served to many dignitaries throughout history. And there is no point in talking about the cheeses, limoncello, sardines, rock samphire, baškotin, honey, liqueur, brandy,... – they have to be tasted.

And finally, do not forget our inedible products made of the Cres wool, soaps, body oils, the Brač stone or the Pag and Hvar lace. Light a candle in a candlestick made of Brač stone, put on a pair of warm slippers made of Cres wool and taste the products bearing the label of the "Croatian Island Product". Like in a fairytale, each taste carries you home to the island, and you can smell the scent of immortelle and sage, feel the sea drops on your face, see the sun ... you live the island.

**THE SEA**

And I look at the sea rising toward me  
and hear the sea say good morning  
and it listens to me I whisper to it  
o good morning sea I say quietly  
then more quietly repeat my greeting to it  
and the sea listens listens and smiles  
then keeps silent then laughs then rises  
and I look at the sea look at the golden sea  
and look at the sea rising toward me  
and good morning I say you golden sea  
and good morning sea the sea says  
and the sea embraces me around the neck  
and the sea and I and with the sea golden sea  
sit together on the shore above the hill  
and laugh laugh at the sea

## **PRVINSKO MASLINOVO ULJE / VAKUMIRANA SUŠENA SMOKVA / HOBOTNICA NA SALATU U MASLINOVOM ULJU / PRVINSKI PRIRODNI SAPUN**

Prvinsko ekstra djevičansko maslinovo ulje – Faust Vrančić, vrhunsko je maslinovo ulje dobiveno hladnim postupkom od autohtonih hrvatskih sorti masline oblice i lastovke. Idealan omjer ovih sorti daje ulju bogat i pun okus, prepoznatljiv miris i intenzivnu zelenozlatnu boju. Specifičnost ovog ulja je izrazito voćna aroma svježeg ploda masline s punočom okusa uz blagu pikantnost i umjerenu gorčinu.

U sušenju smokava na suncu otočani Prvić imaju dugu tradiciju. Beru se i suše s peteljkama. Tradicionalne metode sušenja tehnički su poduprte modernim ekološkim načinom kontrole sušenja i sumporavanja u zatvorenoj komori. Smokve su sušene na stablu i na solarnoj ekološkoj sušilici, bez prisustva insekata. Nakon što smokve dobiju svoj prirodni šećer, pakiraju se s aromatskim lоворovim listom i vakumiraju u višeslojne koekstrudirane vrećice. Vakumirane smokve ne mijenjaju svoja svojstva do godine dana, ako se čuvaju na temperaturi do 10 stupnjeva. Skuhana hobotnica se očisti od sluzi, oguli tamna koža i nareže na komade po želji, začini nasjeckanim češnjakom i peršinom, na kraju posoli i upakira u posudu s maslinovim uljem. Ovaj proizvod objedinjuje i promiče izvorne gastronomске vrijednosti kao posebnost tradicijske prvinske ponude u turističkoj sezoni jahtašima.

Spajajući posebnosti otoka u nizu prirodnih aromaterapijskih proizvoda na bazi maslinovog ulja, zadruga Faust Vrančić je u suradnji sa profesionalnim aromaterapeutima, proizvela prirodni sapun ručno rađen tradicionalnim hladnim postupkom saponifikacije (miješanjem natrijeve lužine s uljem na 35 stupnjeva).

Sapun je napravljen po uzoru na starinski način izrade sapuna u kojem su otočke žene miješale maslinovo ulje sa pepelom i vodom (što je lužina) i zbog takvog postupka izrade nema komercijalna obilježja poput intenzivnog mirisa, nego i teksturom i mirisom i bojom doista predstavlja pravi prirodni sapun kakav su radile prvinske bake.

## **OLIVE OIL FROM THE ISLAND OF PRVIĆ / VACUUMED DRIED FIGS / OCTOPUS SALAD WITH OLIVE OIL / NATURAL SOAP FROM THE ISLAND OF PRVIĆ**

The extra virgin olive oil from the island of Prvić is labelled Faust Vrančić. It is a top-quality olive oil obtained by cold pressing the indigenous Croatian sorts of olives *oblica* and *lastovka*. The ideal proportion of the combination of these sorts is the secret of its rich and full aroma, recognizable scent and intense gold and green colour. Its peculiarity is a strong fruity flavour of fresh olives discreetly complementing its principal intensity, mild spiciness and moderate bitterness.

The Island of Prvić boasts with the long tradition of figs' sun-drying. The figs are picked and dried with stems. The traditional drying techniques are nowadays modernised into up-to-date environmentally friendly methods of controlled drying and sulphurization which take place in closed chambers. These processed figs are dried on trees and on the environmentally-proof insect-free solar dryers. When the figs release their natural sugar, they are packed and the aromatic laurel leaves are added. Then they are vacuumed in multilayer coextruded bags. The packed figs maintain their nutritive properties up to a year if kept at a temperature of maximum 10 degrees Celsius. The boiled octopus is firstly cleaned from mucilage and its dark skin is peeled off. Then it is sliced to pieces, savoured with garlic and parsley, salted and packed in a container with olive oil. This product incorporates the authentic gastronomy of the traditional cuisine of the Island of Prvić. It is a specialty most commonly requested by yachtsmen during tourist season.

With the scope to sublime the unique features of the Island in a series of aroma-therapeutic products based on olive oil, the Faust Vrančić Cooperative, assisted by professional aromatherapy specialists, has designed a natural hand-made soap. It is produced using the saponification method, i.e. by mixing sodium lye with oil at 35 degrees Celsius. This is an antique technique traditionally used by local women who blended olive oil with ash and water, i.e. lye. These soaps do not contain any of the commercial substances of the related industrial products, such as intense smell, etc. Namely, their texture, scent and colour are true to the traditional products made by grandmothers on the Island of Prvić.

## TRAVARICA / LINIJA LIKERA (MIRTA, KADULJA, VIŠNJA) / DOMAĆA MARMELADA (NARANČA, MANDARINA) / EKSTRA DJEVIČANSKO MASLINOVNO ULJE

Ova travarica rađena je od rakije lozovače uz dodatak aromatičnog i ljekovitog bilja ubranog u čistoj prirodi otoka Brača na nadmorskoj visini od 250 do 600 m. Rakija je bistra, oštrog okusa, prijatnog i specifičnog mirisa. Služi se kao aperitiv i kod probavnih smetnji pa je otočani zovu i "likarija".

Linijski liker rađen je prema staroj obiteljskoj recepturi od biranih plodova s otoka Brača. Liker od višnje maraske, uz dodatak lozovače, karakterističnog je okusa i arume. Liker od mirte, također uz dodatak lozovače, izrazite arume plodova mirte, nikoga ne ostavlja ravnodušnim. Liker od kadulje, prozirno žutozelene boje, prekrasnog okusa i arume, spravljen je od lozovače u koju su stavljeni pomno birani listovi kadulje, sušeni za ovu prigodu.

Marmelade su također proizvedene po staroj obiteljskoj recepturi od neprskanih autohtonih pomno biranih plodova (domaća polukisela naranča i mandarina). Odlikuje ih lijepa boja, te odličan okus i aroma.

Maslinovo ulje dobiveno je hladnim prešanjem maslina iz vlastitog maslinika. Karakterizira ga žutozelena boja, srednje intenzivan miris i okus po zelenom plodu masline, trave i lišća, skladna srednje intenzivna gorčina i pikantnost s okusom gorkog badema s cvjetnom notom.

## TRAVARICA—HERB GRAPPA / LIQUEURS (MYRTLE, SAGE, SOUR CHERRY) / HOME-MADE MARMALADE (ORANGE, MANDARIN) / EXTRA VIRGIN OLIVE OIL

*Travarica* is a kind of grappa made from grapes with the addition of aromatic and medicinal herbs growing on the pristine slopes of the Island of Brač. These herbs grow at the elevation of 250 to 600 meters above the sea level. The grappa is a limpid drink of distinct aroma and pleasant scent. It is served as an appetizer and helps with indigestion. Therefore, the local inhabitants frequently recur to it as a medicine.

The liqueur's collection is produced from the carefully selected fruit growing on the Island and prepared according to an old family recipe. The cherry liqueur is made from the *marasca* cherry. When blended with the grape grappa, it unfolds a characteristic taste and aroma. Moreover, the collection comprises the myrtle liqueur which, enhanced with the grape grappa, bestows a seductive myrtle flavour which dangles the senses. There is the sage liqueur characterised by its transparent yellow and green colour, exquisite flavour and aroma. It is made of the grape grappa with the addition of the carefully chosen sage leaves, previously dried for this purpose.

The marmalades are also produced according to an old family recipe. The fruit is not chemically treated. It gets carefully selected (local semi-sour oranges and tangerines). These marmalades have beautiful colour, great taste and aroma.

The olive oil is produced by cold pressing the olives which grow in the family's olive grove. It is characterized by a yellow and green colour and medium-intensity scent. It has a distinct taste of green olives, grass and leaves. Its flavour is a slightly bitter and poignant with a hint of almonds and a flowery note.

**EKSTRA DJEVIČANSKO MASLINOVNO ULJE / EKSTRA  
DŽEM OD SMOKAVA / SMOKVENJAK**

Obitelj Kaštelan proizvodi ekstra djevičansko maslinovo ulje od autohtone sorte oblica. Berba se obavlja ručno, započinje sredinom listopada, a masline se prerađuju isti dan. Rezultat je ulje visoke kakvoće koje svojim mirisom i okusom podsjeća na zdrav plod masline, zelenog voća i pokošene zelene trave.

Ekstra džem od smokava i smokvenjak samo su neke od niza delicija koje se rade od smokava, te su pravi raj za sladokusce.

**EXTRA VIRGIN OLIVE OIL / FIG EXTRA JAM / SMOKVENJAK**

The Kaštelan family produces the extra virgin olive oil from autochthonous *oblica* olive variaty. Olives are manually harvested from mid-October on and processed immediately. The result is the high-quality oil which smells of ripe olives, green fruit and mowed green grass.

The extra fig jam and *Smokvenjak* are some of many delicacies made from figs. They are real gourmet bites.

## ŠOLTANA KLASIKA EKO / ŠOLTANA LEVANTA EKO / RAKIJA TRAVARICA "ŠOLTA NATURA" / UMAK OD SMOKAVA

Šolta je već od antičkog doba otok vinove loze, smokve i masline. Nekadašnju primitivnu agrotehniku zamijenile su moderne uljare, jednostavno ulje od masline prerasta zadnjih godina u prepoznatljivi i traženi vrhunski proizvod. Zadruga EKO RAST ŠOLTA okuplja proizvođače ekstra djevičanskog maslinovog ulja sa otoka koji se godinama nalaze na samom vrhu nagrađivanih maslinovih ulja na međunarodnim skupovima, a koji mahom prelaze na kontroliranu ekološku proizvodnju.

Ekstra djevičansko maslinovo ulje "Šoltana Levanta" je monosortno maslinovo ulje od sorte šoltanka ili levantinka, rasno, pikantno, ugodne gorčine i intenzivnog mirisa na svježu travu i maslinu. Certificirani je ekološki proizvod pod strogim stručnim nadzorom.

Ekstra djevičansko maslinovo ulje "Šoltana Klasika" sadrži 30 – 40 % ulja od rasne šoltanke, ostatak od sočne oblice. Srednjeg je intenziteta, fine gorčine, i mirisa na svježu travu i voće. Također je certificirani ekološki proizvod pod strogim stručnim nadzorom.

Rakija travarica "Šoltana Natura" posebnog je i prepoznatljivog okusa zbog svoje osnove – šoltanske lozovače i 10 tipičnih trava otoka Šolte, među kojima se naročito ističu komorač, primorski vrijesak, metvica i mažuran.

Umak od smokava rezultat je istraživanja i eksperimentiranja šoltanskih domaćica sa smokvom i začinskim biljem. Tako je nastao ovaj jedinstveni proizvod kiselog, slatkog i pikantnog okusa, koji se nudi u dobrim šoltanskim restoranima.

## ŠOLTANA KLASIKA EKO / ŠOLTANA LEVANTA EKO / ŠOLTA NATURA HERB GRAPPA / FIG CHUTNEY

Šolta has been an island of vine, figs and olives since antiquity. Nowadays the former primitive agro-technology has been replaced by up-to-date oil factories. Consequently, the olive oil has become a recognizable and highly demanded top-quality product. Eco Rast Šolta Cooperative gathers the producers of extra virgin olive oil from the Island. They have been awarded olive oil producers at numerous international conferences in the recent years. Many of them have opted for the controlled ecological production of olive oils. The Šoltana Levanta extra virgin olive oil is an olive oil made from šoltanka or levantinka variety. It is dense and piquant, pleasantly bitter and intensively scented of fresh grass and olives. It is a certified ecological product produced under strict professional supervision.

The Šoltana Klasika extra virgin olive oil contains 30-40% of oils from the pure šoltanka sort which is mixed with the juicy oblica sort. This is medium-intensity oil, finely bitter and smelling of fresh grass and fruit. It is a certified ecological product produced under strict professional supervision.

Šoltana Natura herb grappa has a characteristic flavour due to its basis – Šolta's grape grappa and 10 typical herbs growing in Šolta's meadows and hills, such as anise, winter savoury, mint and marjoram.

Fig Chutney is a result of culinary research and experiments with figs and spices. The housewives of the Island managed to create this unique product which blends sour, sweet and spicy tastes. It can be found on the menus in good restaurants on the Island of Šolta.

DJEVČANSKO MASLINOVNO ULJE / SOL ZA KUPANJE  
(LAVANDA, SMILJE) / SUHI CVIJET LAVANDE**

Džem od smokava / džem od smokava sa lavandom sadrži vrlo male količine nerafiniranog šećera i limun, prirodne konzervante koji ističu punoću i intenzitet domaće smokve. Savršena ravnoteža lavande sa smokvom, daje nepcima okus mediterana. Slatko od smokava neodoljiva je delacija s cijelim smokvama u šećernom sirupu razblažena sokom limuna i blagom aromom vanilije.

Smokvenjak predstavlja pravu nutricionističku bombu rađenu po tradicionalnoj recepturi od sušene smokve, prženih bajama i tek malo domaće lozovače. Čuva se u lovoru i koromaču koji mu obogaćuju okus.

Sušene smokve osušene su na suncu, kupane u moru i čuvane s malo lovora i koromača za dug vijek trajanja i poseban okus.

Ekstra djevičansko maslinovo ulje proizvedeno je isključivo iz vlastitih maslinika od sorte oblica, ručno brane i hladno prerađene.

Sol za kupanje sa lavandom / smiljem, sol je iz Jadranskog mora obogaćena lavandom / smiljem u prahu. Koristi se kao prirodna aromaterapijska kupka ili kao prirodni piling za obnavljanje kože. Neuništivo smilje mjestimično pokriva obronke te početkom ljeta omamluje svojim slatkim i opojnim mirisom.

Unutrašnjost otoka Brača miriše lavandom sa danas zapuštenih polja koja strpljivo čekaju da im se vrati njihova vrijednost. Obukli smo našu lavandu u mornarsko ruho i stavili crvenu mašnu.

**JAM (FIG, FIG WITH LAVENDER) / FIG DESSERT / SMOKVENJAK –  
FIG LOAF / DRIED FIGS / EXTRA VIRGIN OLIVE OIL / BATH SALT  
(LAVENDER, IMMORTELLE) / LAVENDER FLOWERS**

Fig jam / fig jam with lavender contains a very small amount of unrefined sugar, lemon and natural preservatives that potentiate the figs' plenitude and intensity. The perfect balance of lavender and fig recalls the smell and taste of the Mediterranean.

Fig dessert is an irresistible delicacy. Whole figs are immersed in the sugar syrup which is then diluted with lemon juice and with tender vanilla flavour. Smokvenjak – fig cake is a real nutritional bomb prepared according to the traditional recipe from dried figs, roasted almonds and a dash of home-made grape grappa. It is kept in laurel and fennel which enrich its flavour.

Dried figs are dried in the sun, bathed in the sea and kept in laurel and fennel for longevity in order to acquire a particular flavour.

The extra virgin olive oil is produced exclusively from olives of the *oblica* variety. This sort grows in the family's olive groves and the olives are harvested manually and then cold pressed.

Bath salt with lavender / immortelle contains the Adriatic salt enriched with lavender / immortelle powder. It is used as a natural aromatherapy bath or natural peeling for skin renewal. The everlasting immortelle sporadically grows on the Island's slopes transmitting its sweet and intoxicating scent in the period of early summer.

The currently uncultivated fields in the Brač' inland abound in lavender emanating the intoxicating smell while patiently waiting to regain their agricultural importance. These lavender products are clothed into navy patterns with the charming ribbon bow.

**VRHUNSKO SUHO VINO PLAVAC MALI “DRAGONS CAVE”**

Ovo autohtono vino potječe s južnih padina otoka Brača i neposredne blizine Zmajeve špilje i sela Murvice. Dobiveno od glasovite sorte plavac mali s prinosom po čokotu maksimalno 0.5 kg vrhunske je kvalitete. Proizvedeno na ekološko tradicionalan način, odležano u hrastovim bačvama, ovo vino odiše voćnim aromama suhe šljive i šumskog voća, isprepleteno mirisom vanilije. Obitelj Barhanović, nakon stoljetne tradicije, mukotrpan trud i dar prirode želi podijeliti s vama.

**THE DRAGON'S CAVE—PLAVAC MALI TOP-QUALITY DRY WINE**

This indigenous wine originates from the southern slopes of the Island of Brač, precisely from the land in the vicinity of the Dragon's Cave and the village of Murvice. It is obtained from the famous *Plavac Mali* grape sort. Its maximum yield per grapevine is 0.5 kg which results in the top-quality wine. This wine is produced by using environmentally friendly and traditional methods; then is left to ripe in oak barrels. Thus it derives its fruity aromas of prune and forest fruit, saturated with vanilla. The Barhanović family preserves the centenarian tradition of the Island's wine production. Combined with the nature's gifts and results of their hard work, it provides us with an exquisite wine.

### **PLAVAC MALI VRHUNSKO VINO BARIQUE "BOSSO" / PLAVAC MALI KVALITETNO VINO "BROČKO RIČ"**

Ponukani željom i potrebom da stoljetnu tradiciju i ljubav prema proizvodnji vina uzdignu na višu razinu, odajući zasluženu joj važnost u svakom segmentu njegova nastajanja i tako ukažu na vrlo često umanjivan potencijal bračkih vina, otac i njegova dva sina vlastitim su rukama započeli krčiti brački kamenjar. Ukrativši njegovu divlju prirodu, usred sirovih ljestvica, gdje škrta zemlja rodi rajskega nektarom, stvorili su vinograd koji broji 35.000 trsova. Nekad "nonotovo malo lozje", danas vinograd na osam hektara površine, s brigom za svaki pojedini trs, redukcijom roda, finalnom selekcijom najkvalitetnijih grozdova i odležavanja u hrastovim bačvama rezultiralo je "rajskom kapjom" plavca malog.

### **BOSSO – PLAVAC MALI TOP - QUALITY BARIQUE WINE / BROČKO RIČ – PLAVAC MALI QUALITY WINE**

The love and need to elevate a centenarian tradition of wine production to a higher level has motivated the Senjković family to reclaim its decayed grandfather's vineyard. Mr Senjković and his two sons have cleared the rocky ground with their own hands, thus reevaluating both literally and metaphorically the potential of the wines produced on the Island of Brač which has sometimes been unjustly underestimated. When the inclement nature is tamed, the avaricious soil of Brač bears heavenly fruits. Thus the Senjković family planted 35.000 vines on over eight hectares. Reducing and strictly selecting the yield with lots of care and dedication, they managed to harvest the highest-quality grapes. They are left to ripe in oak barrels. The result of their endeavour is the heavenly drop of *Plavac Mali* wine sort.

### VRHUNSKO SUHO BIJELO VINO "GRK"

dobitnik  
oznake  
HOP 2011.

"Grk" je proslavio Lumbardu, mjesto na istoku otoka Korčule. To je vino od autohtone sorte grožđa što uspijeva samo u pješčanim vinogradima lumbarajskog polja. Nije poznato da li je ime dobilo radi profinjenog gorkastog okusa ili po Grcima koji su početkom 3. stoljeća prije Krista ovdje osnovali svoju naseobinu i sa sobom donijeli svoje umijeće uzgoja vinove loze i pravljenja vina. Generacije žitelja Lumbarde nastavile su usavršavati to umijeće sve do današnjih dana. Plod te bogate vinogradarske tradicije, suvremene tehnologije i enologije je suho vino izrazite osobnosti prepoznatljive po svjetlozelenkastožutoj boji sa zlatnim odbljescima, naglašenoj sortnoj aromi i plemenitom bukeu. Karakterizira ga bogat, skladan i zaokružen okus, s lagano gorkastim završetkom. Izvrsno se sljubljuje uz kamenice, plemenitu bijelu ribu i uz najbolja jela od bijelog mesa, a može se poslužiti i kao aperitiv. Servira se ohlađen na 12-13°C.

### GRK – TOP - QUALITY DRY WHITE WINE

Lumbarda is a small town on the eastern part of the Island of Korčula. It is famous for its wine called the Greek-Grk. It is a wine made from the grape sort which grows only in the sandy vineyards of Lumbrada's fields. The etymology of the name is still a mystery: it is either due to its sophisticated bitter taste or it derives from the Greek who established a colony there in early 3rd century B.C. bringing the art of wine-growing and wine-making.

The generations of Lumbrada's inhabitants continued improving this art up to the present day. The product of the rich wine growing tradition, the up-to-date technology and oenology is a dry wine of extraordinary features. It is characterized by its light green and yellow colour with golden reflections, distinct sort aroma and noble bouquet. It has a rich, harmonious and full flavour with a slightly bitter finish.

It blends marvellously with oysters, white fish and top-quality white meat. Cooled to 12-13 degrees Celsius it is customarily served as an appetiser.

## **DESERTNO VINO “FOR” / KVALITETNO POLUSUHO BIJELO VINO “POŠIP”**

Tradicija proizvodnje desertnog vina duga je gotovo koliko i tradicija proizvodnje vina. Na strmim i sunčanim položajima, u toplim i suhim jesenima bralo se grožđe s obiljem šećera od kojeg se proizvodilo desertno vino. I danas proizvedena tradicionalnom tehnologijom od presušenog grožđa bez dodataka, desertna vina su kvalitetnija što duže leže. “For” dessertno vino ili kako su ga zvali stari Rimljani *vinum sanctum*, očarava svojim okusom.

“Pošip” je vino od autohtone sorte grožđa koje sadrži 12% alkohola, zlatnožute je boje, karakterističnog bukea, bogate aromе. Proizvodi se pretežito od grožđa s južnih plaža otoka Hvara u ograničenim količinama.

### **FOR—DESSERT WINE / POŠIP—QUALITY SEMI-DRY WHITE WINE**

The tradition of dessert wine production is almost as long as the one of wine production. During the dry and warm autumns people harvested grapes on the steep and sunny slopes. Such grapes have had high sugar content and were ideal for dessert wine production. Nowadays the tradition continues. The wines are still produced from dried grapes using traditional technology with no additives added. The prolongation of ripening enhances quality of dessert wines. *For* or *vinum sanctum* – as called by the ancient Romans – seduces with its alluring flavour.

*Pošip* is a wine made from the autochthonous grape sort which contains 12% of alcohol. It has golden and yellow colour, specific bouquet and rich aroma. It is produced in limited quantities mostly from grapes growing in the southern beaches of the Island of Hvar.

### EXTRA VIRGIN OLIVE OIL

This multi-awarded oil is made exclusively from local *orkula* olive variety (*oblica*). The olive groves are located in Supetarska Draga in the village of Gonar on the Island of Rab. Cultivating approximately 300 olive trees, the family is in the system of ecological production. The olive groves are planted on oily loam soil. The oil has a characteristically bitter taste accompanied by a hint of apple.

## EKSTRA DJEVČANSKO MASLINOVO ULJE "LOČNJAK"

Stoljetna obiteljska tradicija uzgoja maslina na padinama Pliši na istočnom dijelu otoka Brača rezultirala je super premium ekstra djevičanskim maslinovim uljem koje je karakteristično po svojoj specifičnoj voćnoj aromi, umjerene gorčine i pikantnosti. Miriše po pokošenoj travi, zrelim i zdravim plodovima masline, jabuci, boja mu je zeleno-maslinasta. Maslinik je veličine jednog hektara, u kojem se uzgaja 20 stabala isključivo autohtonih sorti maslina (Oblica, Levantinka, Buhavica i Lastovka), na nadmorskoj visini od oko 100 metara, a isto toliko je udaljen od mora. Posebnost ekološkog uzgoja maslina, koje se beru ručno i prerađuju isti dan, garantiraju kvalitetu ulja.

### LOČNJAK EXTRA VIRGIN OLIVE OIL

On the Pliši slopes on the eastern side of the Island of Brač the centenarian family tradition of olive growing is maintained. It has resulted in the production of premium extra virgin olive oil characterised by its fruity aroma, moderate bitterness and poignancy. It smells of mowed grass, ripe olives and apples. It is green coloured. The olive grove stretches over one hectare with 20 trees of indigenous olive varieties (*oblica, levantinka, buhavica and lastovka*). It is situated on the elevation of 100 meters above the sea level and equally distant from the sea. The specialized eco production, manual harvest and immediate oil procession guarantee the oil quality.

**KOZJI SIR U MASLINOVOM ULJU (BOSILJAK I ČEŠNJAK,  
EKO ZAČINI) / ZELENE MASLINE U SLANOJ VODI**

Kockice kozjeg sira prelivene su ekološkim ekstra djevičanskim maslinovim uljem uz dodatak bosiljka i češnjaka uzgojenih u vlastitom polju ili uz dodatak kadulje, koromača i majčine dušice koji samoniklo rastu na Dugom otoku i imaju posebnu aromu.

Kozji sir u maslinovom ulju dobro se sljubljuje sa rajčicom, a može se koristiti za pripremu raznih salata.

Ekološki uzgojene masline iz vlastitog maslinika ručno se beru i spremaju u slanoj vodi. Imaju malo gorkast okus. Dobre su kao prilog uz razne vrste jela i sireva.

**GOAT CHEESE IN OLIVE OIL (BASIL AND GARLIC, ORGANIC  
SPICES) / GREEN OLIVES IN BRINE**

The goat cheese cubes are immersed in the ecologically produced extra virgin olive oil and garnished with home-grown basil and garlic, or with sage, anise and thyme which grow in the fields of Dugi otok. Thus they have a special aroma. Goat cheese in olive oil blends well with tomatoes and is most commonly used in seasonal salads.

The ecological home-grown olives are manually harvested and kept in brine. They have a slightly bitter taste. They are served as gourmand side dish complementing main course or with cheese plates.

HOP 2011.**PAŠKI SIR / MASLINOVO ULJE**

Obiteljsko poljoprivredno gospodarstvo Vidas proizvodi paški sir od nepasteriziranog ovčjeg mlijeka. Svježe pomuženo mlijeko zagrijava se na temperaturu 31 do 32 stupnja Celzijusa, te se dodaje sirilo. Zatim se ostavlja oko sat vremena da se posiri, razreže ga se na komade i ostavi desetak minuta da se digne sirutka. Kasnije se ručnom harfom rasklati na veličinu zrna pšenice i konstantno mijeha do temperature od 41-42 stupnja. Uljeva se u kalupe i opterećeće odgovarajućim utezima. U kalupima ostaje do 6 sati uz povremeno okretanje i mijenjanje sirnih marama. Sprema se u unaprijed pripremljenu salamuru. Nakon 24 sata stavlja se na dasku gdje zrije do prodaje.

Maslinovo ulje obitelji Vidas radi se od ručno branih maslina, koje se čuvaju u plastičnim košarama i tako transportiraju do uljare. Od branja do prerađe najviše prođe 48 sati. Prerađuju se u uljari hladnim prešanjem. Gotovo ulje drži se u plastičnim kantama tijedan dana, nakon čega se uljeva u bačve od inoksa i u njima čuva do upotrebe.

**PAG CHEESE / OLIVE OIL**

The Vidas family farm produces the renowned Pag cheese from unpasteurised sheep milk. The fresh milk is warmed to a temperature between 31 and 32 degrees Celsius and a coagulator is added. Then it is left for an hour to curdle. Afterwards, it is cut into pieces and left ten more minutes for whey to lift. The so-called "harp" is used for stirring and reducing the cheese pieces to the size of wheat seeds. At this point it is relentlessly mixed until the temperature reaches 41 to 42 degrees Celsius. It is then poured into moulds and pressed with special weights. It stays in the moulds for 6 hours with occasional turning and changing of cheesecloth. Finally, it is immersed in the previously prepared brine. 24 hours later the cheese is placed on a board and left to ripen.

The Vidas family olive oil is produced from manually harvested olives which are then stored in the plastic baskets and transported to the oil factory. The maximum of 48 hours passes from picking to production. The olives are cold-pressed in the oil factory. The oil is kept in plastic cans for a week, then poured into inox barrels and stored until sold.

## OPLEMENJENI PAŠKI SIR S ORAŠASTIM I / ILI SUŠENIM VOĆEM

dobitnik  
oznake  
HOP 2011.

Oplemenjeni paški sir s orašastim i / ili sušenim voćem dobiva se postupkom sirenja (izvorni način) od mlijeka autohtone paške ovce. Priprema orašastog i/ili sušenog voća sastoji se od uklanjanja gorkih lupina, čišćenja i pranja voća, sušenja i rezanja na željenu dimenziju (u slučaju orašastog voća). Slijedi postupak kalupljenja, salamurenja i zrenja. Kalupljenje smjesi nakon sirenja odvija se na način da se pripremljeno orašasto i/ili sušeno voće dodaje smjesi nakon sirenja postizanjem željene gustoće voća u smjesi koja se potom smješta u kalupe.

Nakon standardnog prešanja i salamurenja u trajanju od 2 dana sir se prepušta zrenju do 3 mjeseca. Ovakvo pripremljeni oplemenjeni paški sir može se poslužiti kao posebna delicija ili uz topli domaći kruh te umjereno hladno bijelo vino ili prema ukusu uz crno.

## PAG CHEESE ENRICHED WITH NUTS AND / OR DRIED FRUIT

The Pag cheese enriched with nuts and/or dried fruit is produced using the traditional method of curdling the Pag sheep milk. Nuts and/or dried fruit are cleaned of bitter husks, washed, dried and cut into smaller pieces (in the case of nuts). They are then mouldered, brined and left to ripen. The nuts and/or dried fruit prepared in this way are added to the curdled mixture in the quantity which guarantees the desired density. Finally, it gets placed into moulds to undergo the two - day standard procedure of pressing and brining. Afterwards, the cheese is ready to ripen for the three - month period. Thus processed and enriched Pag cheese is a delicacy that is usually served with warm home-made bread and moderately cooled white or red wine as preferred.

## **FRIGANA SRDELA U MASLINOVOM ULJU / JADRANSKA SARDINA (LIGHT, S LIMUNOM, S FEFERONOM)**

Frigana srdela je "novi" proizvod, koji se počeo proizvoditi 60-ih godina, da bi se zbog veće industrijalizacije 80-ih prestao proizvoditi. Proizvodila se isključivo od svježe ulovljene srdele, ručno rezala i slagala, sušila na suncu i buri, samo u određeno doba godine kada su se poklapali ulov i vremenske prilike.

Proizvod je ponovno uveden kako bi se oživjela dugo očuvana tradicija. I danas se proizvodi na tradicionalan način, od najsjećnije ribe, koja se ručno odvaja od nejestivih dijelova, pere, suši i prži u biljnem ulju, te se slaže u limenku i staklenku. Dodaje se maslinovo ulje, te se hermetički zatvara. Limenka tada odlazi na sterilizaciju, pranje i odležavanje do samog trenutka opreme.

Linija jadranskih sardina proizvodi se od svježe ulovljene ili svježe zamrznute jadranske srdele. Strojno ili ručno se reže i čisti od nejestivih dijelova, te kuha u pari, dodaje se limun ili feferoni, limenka se hermetički zatvara i sterilizira toplinom. Zadržava vrijedna nutritivna svojstva. Ne sadrži aditive ni konzervante.

## **FRIED SARDINES IN OLIVE OIL / ADRIATIC SARDINE (LIGHT, WITH LEMON, WITH CHILLI PEPPERS)**

The fried sardine is a relatively "new" product. Its processing commenced in the 1960's, but the production stopped in 1980's due to a larger industrialization. It was made of freshly caught sardines, manually cut and sorted, dried in the sun and north-eastern wind during specific time of the year when the fish catch and weather conditions coincided. The product was reintroduced in order to revive the tradition. Today, it is still produced in the traditional manner using only fresh fish and manually separating eatable from inedible meat. It is then washed, dried and fried in vegetable oil, and finally canned and jarred. Eventually, the olive oil is added and the cans hermetically sealed. The can is then sterilized, washed and stored to await shipment.

The Adriatic sardine product line contains freshly caught or freshly frozen Adriatic sardine. It is cut either manually or with the machine. The inedible parts are cleaned, while the edible ones are steamed and savoured with lemon or hot peppers. Cans are hermetically sealed to preserve valuable nutritive ingredients. The sardines do not contain additives or preservatives.

## "PEŠKARUŠA" SMOTANI INĆUNI / "PEŠKARUŠA" KAPARI NA KVASINU / "PEŠKARUŠA" MARINIRANE

### KOZICE

Čišćenjem i soljenjem svježe pristiglih inćuna s plivarice započinje dvomjesečno konzerviranje ove delicije uz dodavanje salamure i ispiranje. Proces završava odvajanjem fileta od srednje kosti te ručnim motanjem i pakiranjem u staklenke uz dodatak suncokretovog ulja. Ovako pripremljeni inćuni mogu trajati do godinu i pol dana.

Kapari rastu na stjenovitim mjestima uz more, kojima Vis obiluje. Ručno se beru od svibnja do srpnja. Nakon trodnevnog namakanja u moru, suše se i pakiraju u staklenke uz dodatak vinskog octa. Moraju odležati 20 dana nakon čega se konzumiraju. Svježe izlovljene kozice pristižu kočom, čiste se i prelijevaju jabučnim octom uz dodatak soli te drže u hladnjaku 30 sati. Nakon toga se procijede i pakiraju u staklenke uz dodatak suncokretovog ulja i papra u zrnu. Ovako pripremljeni traju do mjesec dana na +4° C.

## "PEŠKARUŠA" ROLLED ANCHOVIES / "PEŠKARUŠA" CAPERS PICKLED IN VINEGAR / "PEŠKARUŠA" MARINATED SHRIMPS

Cleaning and salting freshly arrived anchovy from gillnet, starts a two-month preservation of this delicacy with the addition of brine and rinsing. The process ends with the separation of fillet from the mean bone, hand wrapping and packing in jars with the addition of sunflower oil. Thus prepared anchovies can last up to a year and a half.

Capers grow in rocky places along the coast, which abounds in Vis. Capers are manually harvested from May to July. After three days of soaking in sea, they are dried and packed in jars with the addition of vinegar. Resting time must be 20 days after which they are consumed.

Freshly caught shrimp arrive by Koča, they are cleaned and poured with apple cider vinegar with the addition of salt and kept in refrigerator for 30 hours. They are later strained and packed in jars with the addition of sunflower oil and peppercorn. Thus prepared they last up to one month at +4 ° C.

Makaruni na iglu proizvod su hrvatske otočne tradicijske kuhinje. Rade se od brašna, jaja, ulja, soli i mlake vode i zamijese u jednoličnu masu. Tako oblikovana masa mora se dobro razvaljati. Dobiveno tjesto razdijeli se na više komada koji se oblikuju u male valjke, režu se na manje komade koji se na iglu formiraju u makarune. Makaruni se serviraju kao glavno jelo uz gulaš od mesa, te tradicionalna domaća otočna vina.

**NEEDLE - ROLLED MACARONI**

The needle-rolled macaroni are typical of the Croatian traditional islands' cuisine. Macaroni are made of flour, eggs, oil, salt and tepid water, all blended in a homogenous mass and well kneaded. The dough is then divided in several pieces, each forming small rolls. Rolls are cut in even smaller pieces, and rolled along the knitting needle to assume the shape of macaroni. As a main dish macaroni are served with meat stew and accompanied by the selection of traditional home-made Island's wines.

**SOL SA ZAČINSKIM I AROMATIČNIM BILJEM**

Sol iz najstarije solane na Mediteranu, stonska krupna sol oplemenjena samoniklim aromatičnim biljem iz pelješkog krša, sol je s okusom mora i mirisom Dalmacije.

Ovaj stari gurmanski začin, u kojem samoniklo začinsko bilje pojačava okus kod većine jela, preporučuje se kao dodatak ribi, mesu, ljetnim salatama, peradi i povrću.

Natura Dalmatia radi sol s tri vrste začina: ružmarin, lovor, kadulja, origano, vriesak i majčina dušica / ružmarin, bella luiđa i limunova korica / ružmarin, češnjak, kadulja i papar.

**SALT WITH HERBS AND AROMATIC PLANTS**

This is a salt from the oldest salt pan in the Mediterranean located in the Old Town of Ston on the Pelješac Peninsula. It is enriched with aromatic plants growing in the Pelješac karst. It therefore incorporates the flavour and smell of Dalmatian sea and soil.

It represents the old gourmet spices that compliments and accentuates the flavour of main dishes. It is recommended as a condiment to fish, meat, summer salads, poultry and vegetables.

Natura Dalmatia produces salt with three types of spices: rosemary, laurel, sage, oregano, heather and thyme / rosemary, *bella luigia* and lemon crust / rosemary, garlic, sage and pepper.

HOP 2011.**ŠOLTANSKI PAPRENJAK**

Paprenjak je tradicionalni kolač rustikalnog izgleda, uz male varijacije u okusu i izgledu, poznat u Dalmaciji od renesanse. Još u vrijeme jedrenjaka dalmatinske žene svojim muževima pomorcima spremale su ga u mornarske škrinje za daleka putovanja. Oni su na povratku donosili egzotične začine koje su (ne znajući pojedinačna imena) skupno nazivali papar, pa otuda i naziv paprenjaci.

Šoltanski paprenjak izrađuje se s natpisom Šolta i s reljefom čuvite (sove) koja je zaštitni znak Šolte. Specifičan je i po okusu jer, za razliku od ostalih, sadrži i rogačovo brašno. Ostali sastojci ovog paprenjaka su autohtoni šoltanski proizvodi med, maslinovo ulje i prošek, te integralno pšenično brašno i začini (papar, cimet, klinčić, muškatni oraščić). Radi se ručno, na starinski način, pa otuda njegova šarmantna "nesavršenost" u izgledu.

**ŠOLTANSKI PAPRENJAK—THE ŠOLTA PEPPER-CAKE**

*Paprenjak* is a traditional pepper-cake characterized by its rustic appearance. It has been well known in Dalmatia since the Middle Ages and has undergone slight variations in taste and form in course of the centuries.

The Dalmatian women used to prepare these cakes for their seafaring husbands by storing them inside the wooden chests prior to their setting sails on faraway journeys. Upon their return, the husbands used to bring home exotic spices which they errantly called pepper. Hence the name pepper-cakes.

The Šolta's pepper-cake is labelled Šolta and contains a relief representing an owl—čuvita—which is the symbol of the Island. Its flavour is specific because it contains carob flour as opposed to other pepper-cakes. The other ingredients of the pepper-cake are local Šolta's products: honey, olive oil and sherry, as well as integral wheat flour and spices (pepper, cinnamon, clove, nutmeg). It is hand-made using the traditional techniques, thus it obtains its charming "imperfect" appearance.

## SLASTICE (PUGACA OLIVETA, BUCULIN OLIVA, ŠKANJATA) / TORTA NAŠIH KAPETANA

Škanjata je tradicionalna poslastica u obliku vjenčića od slatkog dizanog tijesta obogaćenog limunom i narančom. Pekla se u gradskim krušnim pećima, kojih je nekad u Cresu bilo 10, kao najfiniji kolač za vrijeme fešta. Creske domaćice uoči blagdana po okolnim selima nosile su na glavi košare pune škanjata koje su prodavale, a radi ravnoteže ispod košare stavljale su posvitek (krpa smotana u krug).

Pugaca oliveta / buculin oliva s maslinovim uljem, obogaćeni su "idealnom masnoćom", izvrsnog mirisa i okusa blagodat su za nepce.

Otočani su oduvijek bili vezani uz more, koje im je bilo izvor života i opstanka. Stekli su mornarske vještine te su se mnogi otisnuli na sinje more i postali vrsni kapetani. Rado su nosili plodove svojih otoka na daleka putovanja, koje su čuvali u "bagulima" (drvenim škrinjama) da ih podsjećaju na njihov kraj i obitelj. Našim kapetanima u čast donosimo vam trajniju slasticu koju možete posluživati uz vino te ju kao nekada kapetani "supati" (močiti). Naše iskustvo, tradicija i ljubav prema otoku omogućila je da danas nastane "torta naših kapetana".

## DELICACY (PUGACA OLIVETA, BUCULIN OLIVA, ŠKANJATA) / "OUR CAPTAINS' CAKE"

*Škanjata* is a traditional garland - shaped delicacy made of sweetened leaven dough, enriched with lemon and orange. It was considered to be the most delicious festivity cake at the times when the City of Cres had as many as 10 bread ovens. Prior to a festivity the Cres' housewives carried baskets full of *škanjata* cakes on their heads to the neighbouring villages' markets. They used to place a rolled scarf – *posvitek* – between their heads and baskets to preserve the balance and right posture.

*Pugaca oliveta* / *buculin oliva* with olive oil, enriched with the "ideal fat" and containing savoury smell and aroma represents a blessing for the palate. The local inhabitants have always gravitated to the sea which represented their source of life and guaranteed survival. They have mastered navigation skills to perfection and traditionally sailed off to the open sea to become excellent captains.

### RABSKI ROGAČIĆI / SIRUP (LIMUN, NARANČA)

Rabski rogačići, deličija koja mami vaša nepca, spravljena je od rogača koji raste u mediteranskom području najmanje 4000 godina. To je biljka koja voli sušne uvjete, naraste do 15 metara u 50 godina. Veliko drvo može u jednom urodu donijeti tonu ploda, a cvate u rujnu i listopadu. U siromašnim otočnim domaćinstvima tradicionalno su se pripremali sirupi od limuna i naranče kako bi obitelj kroz cijelu godinu konzumirala potrebne važne vitamine. U zimskim mjesecima su bili veliki izvor C vitamina pa su se servirali uz čaj i med. Sok se koristi kao osvježavajući napitak i antiseptik.

### RABSKI ROGAČIĆI—RAB CAROBS / SYRUP (LEMON, ORANGE)

*Rabski rogačići—the Rab carobs are a delicacy which pleases the palate. They are made from carob growing in the Mediterranean basin for at least 4000 years. This plant loves arid conditions. It grows up to 15 meters of height in the 50 year period. A large tree can give even a tone of fruit in a single yield. It blooms in September and October. The poor island's households traditionally prepared the lemon and orange syrups in order to supply the family members with the necessary vitamins throughout the year. In winter months they were an important source of vitamin C and were served with tea and honey. Juice is used as a refresher and antiseptic.*

KOLUDRAŠKA ŠTRIKA**

The Benedictine Convent of Saint Margaret is a treasury of traditional crafts which have survived up to the present day. Thus the production of *kolacić* and *štrika* has persisted in the specifically historical and highly creative gastronomy originating from the Benedictine community, town of Pag, Island of Pag and the Zadar County.

What sets apart our nuns' medieval specialties is their top-quality and small-scale home production.

## NAMAZ OD KADULJE / DŽEM (SMOKVA, CRNA MASLINA)

Namaz od kadulje proizašao je iz bogate otočne flore koja svojim osebujnim okusom osvaja naša nepca. Izvrsno se slaže s domaćim ovčjim sirom i pečenom janjetinom, a kaduljina nezabilazna ljekovitost upotpunjena u ovom proizvodu preporučuje se za ublažavanje promuklosti i kašla.

Džem od smokava pripremljen po tradicionalnoj recepturi none, od svježih smokava grijanih creskim suncem iz vlastita smokvika. Izvanredan okus čini ovaj džem delicijom, a izuzetno se dobro slaže sa kozjim i ovčjim sirom.

Džem od maslina jedinstveni je proizvod pripremljen od creske starinske sorte maslina pod nazivom šimjac. Posebnog je i aromatičnog okusa, koji upotpunjuje lokalnu kuhinju poslužen uz ovčju skutu i uz meso divljači.

## SAGE SPREAD / JAM (FIG, BLACK OLIVE)

The sage spread originated as a product of the rich Island's flora. Its unique taste captivates the palate. It blends superbly with home-made sheep cheese and roast lamb. The indisputable medicinal properties of the sage incorporated in the product alleviate sore throat and cough.

Fig jam is prepared according to the traditional grandmothers' recipe. It is made from fresh figs that grow in fig orchards under the warm sun of the Island of Cres. Its exquisite taste makes it a delicacy. It is usually eaten with goat and sheep cheese.

Olive jam is a unique product made from šimjac—an ancient olive variety growing on the Island of Cres. It has a unique aromatic taste. It complements the local cuisine when served with sheep curdled cheese and game meat.

Grm vječno zelene planike daje plod maginju. Grm raste na otvorenim sunčanim predjelima otoka Visa u srcu Jadrana. Iz plodova koji dozrijevaju tijekom studenog i prosinca, vraćen je iz zaborava tradicionalni način obrade i pripreme. Crveno dozreli plodovi prerađuju se u marmeladu nazvanu *njam-njam*, po recepturi starih nona.

**STRAWBERRY TREE MARMALADE**

An evergreen shrub of the strawberry tree bears the strawberry tree fruit. The shrub grows on the sunny areas on the island of Vis in the heart of the Adriatic Sea. The fruit ripens in November and December. Its traditional preparation is saved from oblivion. The red ripe fruit is made into marmalade called *njam njam*, i.e. yummy yummy in Croatian according to the old recipes of local grandmothers.

Na sunčanom otoku Hvaru uvijek nešto cvjeta i pčelari se od davnina. U polju s košnicama našeg proizvođača među ostacima rimske vile pronađeni su dijelovi antičke keramičke košnice, dokaz da hvarske medovi čuva tisuće godina povijesti. Cvjetni med Zdravka Fistonića autentični je otočni proizvod jer njegove košnice nikada ne napuštaju otok Hvar.

U njemu se miješaju opojni proljetni mirisi otoka, a njegov okus spaja prošlost sa sadašnjosti.

**FLOWER HONEY**

The sunny Island of Hvar is always in bloom. Consequently, there has been plenty of honey production since the ancient times. Among the remains of an old Roman villa located in Mr Fistonić's field, the debris of a ceramic beehive were found, thus proving that Hvar's honey production has spun across centuries. The flower honey produced by Mr Zdravko Fistonić is the Island's authentic product due to the fact that his beehives never leave the island. The honey is a blend of intoxicating spring scents of the Island, while its flavour bonds past with present.

HOP 2011.**MED (RUŽMARIN, KADULJA)**

Netaknuta priroda Kornatskog arhipelaga stoljećima čuva svoja bogastva i ljudima daje malo, taman toliko koliko treba. Za svu muku rada u tim uvjetima, izuzetna kvaliteta meda je ono što je privuklo obitelj Osredečki da na najudaljenijem naseljenom otoku Kornata, Žirju, prije desetak godina smjesti svoj pčelinjak. Okružje u kojem je smješten pčelinjak, čista je priroda okružena plavim morem. Na Žirju ne postoji industrija ili bilo koji drugi oblik ljudske aktivnosti koji bi ugrozio netaknutu prirodu. A tako je i u velikom radijusu Nacionalnog parka Kornati.

Otok obiluje kaduljom i ružmarinom, a ljekovita svojstva tih biljaka poznata su već stoljećima i od davnina se koriste kao prirodan lijek za razne bolesti te prevenciju istih. Ružmarinov med preporučuje se za prevencije i liječenje bolesti krvotoka te očuvanja jetre, dok kadulja djeluje antiseptički i umirujuće te pomaže u liječenju dišnih puteva.

**HONEY (ROSEMARY, SAGE)**

The unspoiled nature of the Kornati Archipelago has maintained its richness and granted people only as much as was sufficient for living. The hard work has always been a prerequisite essential for facing the harsh conditions. The exquisite quality of honey attracted the Osredečki family to establish its apiary on the Island of Žirje ten years ago. Žirje is the furthest inhabited island of the Kornati Archipelago. It is situated in the midst of the intact nature and surrounded by the blue seawaters with no industry or any human activity which could jeopardise the pristine environment. These conditions are akin to all the islands of the Kornati National Park.

The Island abounds in sage and rosemary which contain well-known medicinal properties used ever since the ancient times as remedies and for prevention of various diseases. The honey made of rosemary is recommended for the circulatory system and liver problems, whereas the sage has antiseptic and soothing effects aiding especially the respiratory tract.

### MED KADULJA / MED S DODACIMA (BADEMI, ORASI, SUHE SMOKVE) / MEDICA—LIKER OD MEDA

Na južnom dijelu otoka Raba gdje prevladava krš, kamen i kadulja, svake godine u svibnju, obitelj Karlić odvozi svoj pčelinjak. Škrtla zemlja čuva svoje blago, koje daruje u obliku meda od kadulje. Kadulja je kraljica medova, aromatičnog okusa i mirisa čija ljekovita svojstva znanost još istražuje. Nudi se upakirana samostalno ili se obogaćuje probranim voćem (suhe smokve, bademi, orasi) te se dobije delicija med s dodacima. Miješanjem s prirodnom rakijom dobiva se "medica", fini liker od meda, karakterističnog okusa i mirisa.

### SAGE HONEY / HONEY WITH ALMONDS, WALNUTS, DRY FIGS / MEDICA—HONEY LIQUEUR

Each May the Karlić family transfers its apiary to the southern part of the Island of Rab. The avaricious karst hides its treasures to offer it afterwards as sage honey. The sage honey is the queen of honeys due to its aroma and scent. Its medicinal properties have not still been scientifically proved in full. It is sold as pure honey or as a delicacy enriched with the selected fruit (dry figs, almonds, walnuts). When the honey is blended with the home-made grappa, a savoury pleasantly-scented honey liqueur—*medica*—is obtained.

## **ETERIČNO ULJE KADULJE / HIDROLAT KADULJE / ČAJ KADULJA**

Kadulja se ubraja među najljekovitije biljke naše planete. Stare civilizacije upotrebljavale su je kao lijek za gotovo sve bolesti, imala je status svete biljke pa se skupljala za ceremonije. Kadulju možemo naći u primorskim krajevima sredozemnih zemalja. Pradomovina joj je Dalmacija, odnosno srednjodalmatinski otoci. Tu se nalaze Kornati, više od 7 nautičkih milja udaljeni od kopna, gdje je ljekovita kadulja samonikla biljka. Jedna je to od malobrojnih oaza čiste prirode u kojoj je kadulja pronašla sve što joj je potrebno za rast.

Ovi jedinstveni proizvodi od kadulje našli su svoju primjenu u različitim područjima. Koriste se u terapeutske (masaže, inhalacija, kupke, oplemenjivanje prostora), kozmetičke i zdravstvene svrhe.

### **SAGE ESSENTIAL OIL / SAGE HERBAL DISTILLATE / SAGE TEA**

The sage is a plant with numerous medicinal properties. It had served as a remedy to the ancient civilisations; it had even been regarded as a holy plant indispensable at ceremonies. It grows in the coastal regions of the Mediterranean. Its place of origin is Dalmatia, i.e. the central Dalmatian islands, such as the Kornati Archipelago which is more than 7 nautical miles away from the mainland. There the sage grows freely. This is one of the few oases of unspoiled nature where the sage has found all it needs to grow.

These unique sage products are used for different purposes; e.g. for therapeutic (massages, inhalation, baths, space refresher), cosmetic and medicinal.

Na vlastitoj plantaži i u čistoj prirodi otoka Raba, Barbara Matušan pažljivo odabire i skuplja mirisno otočno bilje i prerađuje ga u vlastitoj destileriji. Njen proizvod su, pored ostalog, i hidrolati – cvjetne vodice dobivene destiliranjem ljekovitih biljki. Kondenzacijom vodene pare koja prolazi kroz bilje nastaje hidrolat i eterično ulje koji se razdvajaju u separatoru. Hidrolati se koriste u terapeutske i kozmetičke svrhe.

### HERBAL DISTILLATE (LAVENDER, REDWOOD, CYPRESS, ROSEMARY, IMMORTELLE)

On her plantation located in the pristinely clean nature of the Rab Island, Ms Barbara Matušan carefully chooses and collects aromatic island plants and processes them in the family distillery. One of her many products is the line of herbal distillates – floral waters - obtained by distillation from medicinal plants. The condensation of water steam passing through the plants results in an herbal distillate and essential oil which are subsequently separated. Herbal distillates are used for therapeutic and cosmetic purposes.

Samouki kipar i slikar Ivica Tomičić Tajnikov, sakuplja osušene cvjetove agave, koja cvjeta jednom u 100 godina, te nastavlja i čuva obiteljsku tajnu sušenja, obrade i eko zaštite ručno rađenih izvornih unikatnih suvenira od agave. Izrada je vezana uz etnografiju, običaje i tradiciju sela Velo Grablje na Hvaru. Verdica je suvenir primjenjene naivne umjetnosti, posebnom obradom zaštićen pigmentom agave, u kojem se može držati suho voće ili suho ljekovito bilje i cvijeće.

#### SOUVENIR MADE FROM THE AGAVE FLOWER—VERDICA

A self-taught sculptor and painter Ivica Tomičić Tajnikov collects dried agave flowers which bloom once in 100 years. He maintains the tradition by preserving the family secret which prescribes the methods of drying, treating and eco protecting of these unique handmade agave souvenirs. The production is closely related to the ethnography, customs and tradition of the village of Velo Grablje on the Island of Hvar.

*Verdica* is a souvenir of the applied naive arts. It is rendered special by using the agave pigment which is treated to guarantee its durability. It is used for keeping dried fruit or dry medicinal herbs and flowers.

#### KAMENICA—SUVENIR OD BRAČKOG KAMENA

Kamenica iz visoko obrađenog bračkog maramora, kombinacijom ručne i strojne obrade, prepoznatljivih je linija i oblika. Estetska i uporabna vrijednost karakteristika je ovog proizvoda. U prošlosti se u kamenicama čuvalo maslinovo ulje. Ovaj suvenir pogodan je za istu namjenu, a u njemu se sve češće drži domaći sir s maslinovim uljem, koji se dobro spaja s bračkim kamenom.

#### STONE BOWL—KAMENICA—SOUVENIR CARVED IN THE BRAČ STONE

The stone bowl is made of the high-quality Brač marble which is carved both manually and mechanically. This product is characterised by its recognizable lines and forms and as such represents an object of aesthetic and applied value.

Stone bowls were traditionally used for olive oil keeping. Nowadays this souvenir is utilised for the same purpose as well as for storing the home-made cheese in olive oil whose flavour complements superbly the Brač stone texture.

Iška tradicijska keramika (peka-črpna, lopiž, teća, fogun, lub, mugar, škladin, furnjera, furuna, koguma-pićona, prsura, pitar, tiganj) autora Predraga Petrovića, “posljednjeg iškog lončara” i prvog modernog oblikovatelja keramike s otoka, rađena je na ručnom lončarskom kolu “kotoru” i sačuvana od zaborava. Legenda kaže da su iški lončari u gajetama i bracerama nakrcani ma lopižima, trgovali Jadranom od Raba do Boke Kotorske i Ulcinja. Fama je to o Ižu kao svojevrsnom fenomenu u kojem se, zahvaljujući nalazima gline, od pamтивјекa proizvodila keramika, kojoj u tom dijelu zemlje nije bilo prema—po funkcionalnosti, jednostavnosti i začudnoj ljepoti.

Škarpini su tradicionalna muško - ženska obuća otoka Iža, specifična po tome da se može nositi i na lijevoj i na desnoj nozi. Za potplat se rabila volovljka koža “usanje” koja se spajala s naplatom od tanke kože i platna preko drvenog kalupa “kopita”.

Taj se proces zvao “počivanje”. Šivalo se iglom i šilom pri čemu se koristio vosak i štitnik za ruku “gvardaman”.

The Island of Iž is proud of its traditional ceramics production, particularly of the baking lids which assume numerous language variations in the Island's dialect, such as: *črpna, lopiž, teća, fogun, lub, mugar, škladin, furnjera, furuna, koguma-pićona, prsura, pitar, tiganj*. Mr Predrag Petrović is the last potter of Iž and the first modern ceramics designer who manually produces pottery on a wheel called *kotor*, thus preserving the craftsmanship for the future generations. The legend has it that the Iž potters traded *lopiž* baking lids in *gajeta* and *bracera* boats across the Adriatic from Rab to Boka Kotorska and Ulcinj. Thus the fame about Iž has spread throughout the region. It has become some kind of a phenomenon primarily because of clay deposits found on the Island which enabled the prolific production of ceramics since the ancient times. The quality of the Iž ceramics surpassed all others in this part of the country due to its functionality, simplicity and allure.

Škarpini are the traditional male and female shoes originated from the Island of Iž. What distinguishes them from other footwear is the fact that they can be worn on left and right feet respectively. Soles were made from buff—*usanje*

Murterska škrinjica "Baul" umanjena je varijanta veće škrinje koja je služila za razne namjene u domaćinstvu kao i prilikom udaje mladih djevojaka za stavljanje djevojčine dote, pa odatle i vuče ime "Baul". Izrađuje se od drva u tri kombinacije (smreka, mahagonij, maslina). Izrezbarena je različitim domaćim otočnim motivima (tipičan je murterski cvjetni motiv), s ukrasnim ručicama sa strane, u mat ili sjajnoj izvedbi. U svom unutarnjem dijelu ima pretince za različite namjene i ogledalo. Danas ima suvenirsku namjenu i u njoj se mogu držati različiti predmeti.

### THE "BAUL"—THE MURTER CHEST

The "Baul" i.e. the Murter chest is a smaller version of a larger chest which had multi-folded purposes in the traditional household. It predominantly treasured maidens' dowries at the time of their marriage, thus deriving its name—the "Baul". It is made of wood in three combinations (spruce, mahogany and olive). It is characterised by various local motives carved on it (typical one being the Murter floral motive); by decorative handles on the sides, etc. They come in matte or shiny versions. Inside there are multi-purpose compartments and a mirror. Nowadays, the "Baul" is a souvenir and can be used for keeping different items.

Mljetska vrša je jedan od najstarijih ribolovnih alata na Jadranu. Izrađuje se od tankih prutića mirte, somine ili divlje masline. Mljetska vrša je valjkastog oblika pletena trostrukim redom šiblja, dva reda koso unakrsno i treći vodoravno kružno. Plete se u raznim veličinama zavisno od vrste ribe koja se želi loviti. Razlika od ostalih vrša je u tome da mljetska vrša ima dva uzastopna "ostrca", trapule ili zamke, a plete se isključivo autohtonim dalmatinskim šibljem.

### **MLJET FISHING TRAP—INDIGENOUS MLJET SOUVENIR**

The Mljet fishing trap is one of oldest fishing tools in the Adriatic. It is made of thin twigs of myrtle, juniper or wild olive. In order to construct its particular cylindrical shape the wattle is woven into trifurcate pattern, combining two slant diagonal layers and the third horizontal layer intertwined circularly. It comes in different sizes depending on the type of fish its intended for. It differs from all the others fishing traps because of its characteristic two successive traps (*ostrca*, *trapula*, *zamka*) that other fishing traps lack. It is exclusively made of the indigenous Dalmatian wattle.

**"VUNENO SANJARENJE" – PROIZVODI OD DOMAĆE  
OVČJE VUNE (PAPUČE / MIRISNI JASTUČIĆI)**

Linijom "vuneno sanjanje" nastoji se prikazati široki spektar u pristupu izvornom materijalu – ovčjoj vuni. Njenom preradom čuva se ekološki sustav otoka i spajaju vrijednosti kulturne baštine sa suvremenim načinom života. Proizvodi su visokokvalitetni i unikatni, odjevni i uporabni.

„RAB - PUR“ posebnu pozornost posvećuje edukaciji pa u zimskim mjesecima organizira radionice filcanja ovčje vune za djecu od 5 do 10 godina te za mladež i odrasle.

**"WOOLLEN DAYDREAMING" – COMPRIMES VARIOUS HOMEMADE  
SHEEP WOOL PRODUCTS (SLIPPERS / SCENTED PADS)**

The Woollen Daydreaming Collection features numerous products made from the natural material – the sheep wool. The wool processing is environmentally friendly and respects the island bio diversity. Moreover, it promotes the cultural heritage values by intertwining them with the contemporary lifestyles. These are high-quality unique products which can be worn and used for everyday purposes.

“RAB - PUR” is a fervent advocate of traditional crafts. Therefore, during the winter months it organises sheep wool felting workshops for children aged 5 to 10, young people and grown-ups.

## ČIPKA OD NITI AGAVE

Samostan sestara benediktinki poznat je u cijelom svijetu po čipki od agave čija je tradicija započela prije 130 godina i njeguje se samo u ovom samostanu. Mukotrpan posao započinje izvlačenjem niti iz svježeg lista agave koje se zatim obrađuju na specifičan način. Čipka se ne izrađuje prema ustaljenom nacrtu, nego je svaka proizvod mašte pojedine sestre i kao takva je unikatna umjetnička tvorevina.

Po tehnici rada razlikuju se tri vrste čipke:

- **TENERIFA** (radi se malom šivaćom iglicom na kartonu)
- **TENERIFA S MREŠKANJEM U KRUGU** (radi se malom šivaćom iglicom i metalnom iglom za mrežu. Na tenerifi se nadovezuje mreškanje u krugu)
- **VEZENJE TANKOM IGLOM ZA MREŽU** (na razapetoj mreži izvodi se raznim bodovima vez malom šivaćom igлом)

Čipke su dugotrajne, čuvaju se pod stakлом, ne peru se i ne glaćaju.

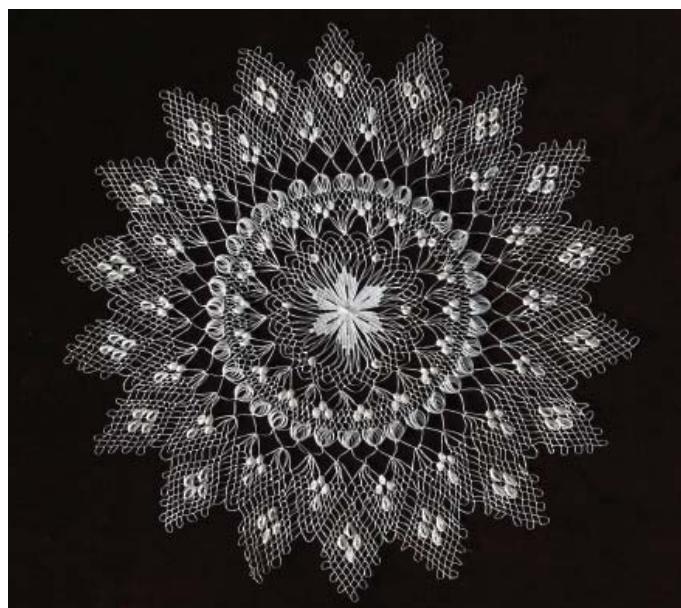

## AGAVE FIBER LACE

The Benedictine Sisters' Monastery is famous worldwide for its agave lace craftsmanship. The tradition was conceived 130 years ago and has survived solely in this monastery. The laborious work commences by extracting fibres from the fresh agave leaves and processing them in a specific way. The lace design does not follow a defined pattern; instead, each lace is the original product of imagination of its creator and as such represents a unique artistic creation.

Depending on working technique, there are three types of laces:

- **TENERIFA** (made using a small sewing needle on cardboard)
- **TENERIFA WITH NETTING** (made using a small sewing needle and a metal netting needle, netting is added to the *tenerifa*)
- **EMBROIDERY USING A THIN NETTING NEEDLE** (embroidery is made by producing different stitches on a stretched net using a small sewing needle)

Laces are long-lasting if kept under glass; washing or ironing is strictly forbidden.

## MASMALIĆI – SUVENIRI IGRAČKE OD CRESKE VUNE

Udruga Ruta kroz kreativne radionice s djecom i mladima u cresskoj vuni realizira projekte koji su usmjereni na upoznavanje i očuvanje prirode i tradicije svog kraja. Na otoku Cresu postoje legende o malom patuljku Masmaliću. Kroz trogodišnji projekt "Tajna Masmalića" djeca i mlađi su od vune u tehnići filcanja izrađivali crvene kapice, lutke, broševe, tapiserije. Kroz projektne aktivnosti nastojalo se prenijeti poruke Masmalića: poštuj prirodu i sačuvaj je za budućnost.

Odabrali smo priču sa sjevernog dijela otoka Cresa o "Masmaliću" iz šume Tramuntane. U Tramuntani, drevnoj šumi punoj šuštavih tajni živi Masmalić. Dobroćudan je i rado će pomoći čovjeku. Ali...naljutiš li ga galameći ili bacajući kamenje koje remeti tišinu njegova doma, može biti prkosan i osvetoljubiv, navesti te na krivi put i uplašiti. Tog malog čovjeka prepoznat ćeš, ako ti se odluči pokazati, po crvenoj kapici i plavim hlačicama.

## MASMALIĆI – SOUVENIRS TOYS MADE OF THE CRES WOOL

The Ruta Association implements projects which aim to promote the preservation of natural and historical heritage of the Cres Island. Therefore, it organizes workshops for children and youngsters where participants express their creative ideas using wool as one of the materials easily found on the Island. There is a popular Island's legend involving a baby dwarf named *Masmalić* who captivates children's minds; thus transmitting messages about the importance of nature preservation. The Ruta Association launched "the Masmalić Secret" Project three years ago offering children and youngsters the opportunity to conceive and design red caps, dolls, brooches and tapestries by wool felting techniques.

These project activities call upon the environmental conservation as legacy for future generations.

For this occasion we would like to recount a story about the *Masmalić* baby dwarf which takes place in the Tramuntana forest on the northern part of the Island. A little Masmalić lives in Tramuntana, the ancient forest full of whispering secrets. He is good-humoured and well-intentioned little being eager to assist every man. But if you make him angry by shouting or throwing stones which disturb the silence of his home, he becomes defiant and vindictive. Then he scares you and leads you to the wrong path. You shall recognise this little man, if he wishes to reveal himself to you, by a red cap and blue short pants.

**EDUKATIVNE SLIKOVNICE / SLAGALICE - PUZZLE**

Unutar serijala "Čudesni svijet Kornatskog otočja" pripremljen je niz edukativnih materijala (slikovnice, slagalice) s ciljem informiranja i edukacije lokalnog stanovništva i posjetitelja o prirodnim vrijednostima Kornatskog otočja i potrebi njihova očuvanja. Do sada je izrađena "Priča o Leonardu" – morskoj kornjači – glavatoj želvi, strogo zaštićenoj vrsti, "Bepo i Kantica" koja govori o problematiki odlaganja otpada u more te priča o Šišmišima – "Šišmiš Vanja". Osim na hrvatskom, slikovnice se tiskaju i na stranim jezicima, a svaku od njih prate i slagalice za djecu.

**EDUCATIONAL PICTURE BOOKS / JIGSAW PUZZLES**

A series of educational material (picture books, jigsaws, puzzles) has been prepared as part of the serial entitled "The Amazing World of the Kornati Islands". Its aim is to inform and educate the local population and visitors about the natural beauty and potential of the Kornati Islands accentuating the need for their preservation.

So far the following stories have been created:

"The Story about Leonard": Leonard is a sea turtle (a loggerhead turtle) which belongs to the family of the highly-protected species;

"Bepo and a Small Can" deals with the issue of waste disposal into the sea and "Vanja the Bat" depicts the life of bats.

In addition to the Croatian version, picture books are also published in several foreign languages, each accompanied by children's puzzles.

HOP 2011.**EKO - EDUKATIVNE SLIKOVNICE**

Projekt Ljiljane Festini da u slikovnicama ukoriči kulturno-povijesnu tradiciju, hvalevrijedan je pokušaj da se za najmlađe sačuva u memoriji niz događaja povezanih uz otok Pag, a kroz glavne junake, solinarku, malu ribu koja živi u moru visoke slanosti, uz bazene solane, i kulika, pticu koja je pred izumiranjem i na Pagu postoji još samo dvadesetak parova. Kulik je naziv za pticu koju Pažani zovu čurlin.

Slikovnice govore o jednom od segmenata života u Pagu ili paškoj prošlosti (paška čipka, solarstvo, paški sir, paško jezero, ribe, školjke, ljevkovo bilje, baškotini, narodna nošnja, karneval, ljevkovo blato, Juraj Dalmatinac, Bartul Kašić). U svakoj slikovnici postoji i kutak za roditelje gdje ih autorica upućuje kako djeci objasniti temeljni sadržaj slikovnice. Slikovnice su dvojezične (hrvatski / engleski).

**ECO - EDUCATIONAL PICTURE BOOKS**

Ms Ljiljana Festini has designed a series of picture books depicting historical and cultural events embedded in the tradition of the Island of Pag. It is a praiseworthy endeavour aiming to preserve Island's anecdotes and heritage for the future generations. The main characters are Toothcarp and Dotterel; the first is a small fish whose natural habitat is highly concentrated sea water; the other is a bird on the verge of extinction; only approximately twenty couples can be found on the Island.

Each picture book deals with a particular theme of the Pag's life and Pag's history: its lace, salt production, cheese, lake, fish, seashells, herbs, traditional biscuits (*baškotini*), traditional costumes, carnival, healing mud; as well as its famous citizens: Juraj Dalmatinac and Bartul Kašić.

Moreover, each picture book has a separate section containing guidelines for parents on how to introduce and explain the topics to the children.

All picture books are bilingual (in Croatian and English).

**RAPSKI SMOKVENJAK / EKSTRA DŽEM OD SMOKAVA /**

**LIKER OD LAVANDE / SUHI CVIJET LAVANDE /**

**ETERIČNO ULJE LAVANDE**

Rapski smokvenjak delicija je spravljena od smokve sušene tradicionalnim načinom samo na suncu. Stopljene sa bademima, rakijom aromatiziranom suhom smokvom, te čuvane u suhom listu lovora, daju posebnu deliciju otoka Raba.

Liker od lavande aromatiziran izvornim cvjetom lavande iz vlastite je proizvodnje.

Oduvijek je glavni izvor ljetnih delicija rapskog težaka bila smokva (dobrica, bilica, zemljica) koja se nudi u đemovima osunčanog Raba.

Rapsodija najljepšeg mirisa otoka Raba eterično ulje i suhi cvijet lavande "budrovke" složen je u romantičnim vrećicama ručno sašivenim.

**RAB FIG LOAF—RAPSKI SMOKVENJAK / FIG EXTRA JAM /  
LAVENDER LIQUEUR / DRY LAVENDER FLOWERS / LAVENDER  
ESSENTIAL OIL**

Rab fig loaf—*Rapski smokvenjak*—is a delicacy made of traditionally sun-dried figs. Blended with almonds and dried fig brandy, and kept in dry laurel leaves, figs are a special delicacy of the Island of Rab. Lavender liqueur is aromatised with authentic lavender flowers from own production.

Figs (*dobrica, bilica* and *zemljica* varieties) were always the main summer delicacy for Rab peasants, and now they can be tasted in jams of the sunny Island of Rab.

A rhapsody of the Island of Rab's most beautiful scent hides in *budrovka* lavender essential oil and dry flowers, assembled in romantic manually sewn bags.

Dugogodišnje iskustvo i znalačko umijeće u proizvodnji likera i rakija u obitelji Antunović rezultiralo je ponudom dva nova likera. Dio netaknute prirode poluotoka Pelješca pretočen je u boce spravljanjem gastronomskog napitka: limun krem proizveden je od mlijeka, ekološki uzgojenog limuna i ljekovitog bilja, prema staroj recepturi iz vremena Dubrovačke republike, dok je višnja rezultat primjene stare obiteljske recepture koja se prenosila iz generacije u generaciju, intenzivnog okusa i rubin crvene boje.

### LEMON AND SOUR CHERRY CREAM LIQUEURS

Years of experience and expert knowledge of production of liqueurs and brandies in the Antunović family resulted in two new liqueurs in their offer. A part of unspoiled nature of the Pelješac peninsula has been poured into bottles of a gastronomic beverage: lemon cream is made of milk, ecologically cultivated lemon and medicinal herbs, according to old recipes from the time of Dubrovnik Republic, while the sour cherry liqueur is a result an old family recipe passed on from one generation to another; it has an intense taste and a ruby red colour.

Liker je proizveden u obitelji Mardešić na tradicionalan način. Priroda je podarila otoku Visu klimu idealnu za uzgoj limuna praktično iz ekološkog uzgoja, jer osim zalijevanja nije ničim tretiran. Zdrav i prirodan taj limun je idealan za ovaj proizvod, jer je osnova proizvoda njegova kora, a komiški limun poznat je po svom okusu i mirisu.

### LEMON LIQUEUR

The liqueur is traditionally produced by the Mardešić family. Nature provides the climate ideal for ecological cultivation of lemon, which is treated only with water. Healthy and natural, lemon is ideal for this product, the basis of which is the lemon peel, and Komiža lemon is renowned for its taste and aroma.

## LINIJA RAKIJA (KOMOVICA, MIRTA, ROGAČICA, TRAVARICA, MEDOVINA, MIX NO1) / KVALITETNO VINO PLAVAC 2006

Roki's je ovaj put ponudio rakije specifičnog okusa i proizvodnje. Komovica je proizvedena od fermentirane grožđane komine sorte Bugava, travarica se dobiva kao macerat aromatskog bilja i voća s otoka Visa (koromač, mirta, kadulja, rogač, ružmarin, ruta, limun i naranča), rogačica od plodova viških rogača u rakiji, mirta od viških plodova mirte u rakiji, a mix No1 je macerat rogača, mirte i kadulje u rakiji.

Plavac 2006 je vino koje se dobiva od autohtone sorte Plavac mali s posebnih položaja otoka Visa na južnoj strani. Njegovo bogatstvo rubinske boje i osebujnost tanina daje mu visoke promile alkohola (15,2 %), ali je tako harmonično zaokružen i pun da se ne osjeća jakost. Dobiva se od ekološki proizvedenog grožđa.

## KOMOVICA GRAPE BRANDY, MIRTA MYRTLE BRANDY, ROGAČICA CAROB BRANDY, TRAVARICA HERB BRANDY, MEDOVINA HONEY BRANDY, MIX NO1 / PLAVAC MALI QUALITY WINE

Roki's now offers brandies of a specific taste and make. *Komovica* grape brandy is made from fermented grape mash of *bugava* variety, *Travarica* herb brandy is produced as a macerate of aromatic plants and fruit from the Island of Vis (anise, myrtle, sage, carob, rosemary, rue, lemon and orange), *Rogačica* carob brandy is obtained from Vis carobs in brandy, *Mirta* myrtle brandy from Vis myrtle in brandy, and Mix No. 1 is a macerate of carob, myrtle and sage in brandy.

*Plavac 2006* is a wine obtained from an indigenous *Plavac Mali* variety which grows on special locations on southern side of the Island of Vis. Its rich ruby red colour and distinctiveness of tannin provide higher volumes of alcohol (15,2%), but its taste is so harmoniously rounded and full that its strength is hardly felt at all. It is made from ecologically cultivated grapes.

## EKSTRA DJEVČANSKO MASLINOVNO ULJE

Postoje mesta i prostori na kojima su vrijeme, ljudska povijest i trajanje na poseban način uočljivi, bliski i sveprisutni. Otok, ta dragocjenost kama i zemlje, mjesto je brojem oskudnih ali značajem univerzalnih i trajnih vrijednosti. Otok Krk, zbog svoje veličine i položaja, na čudesan i jedinstven način objedinjuje u sebi i kopno i otok. Očuvani pejzaži, šume i osebujni klimatski uvjeti te čista zemlja i voda omogućuju nam i danas baštiniti i uživati u plemenitom okusu i svojstvima pravoga maslinovog ulja, dozrelog na škrtoj, suncem i radom blagoslovljenoj zemlji. Upravo ta povezanost i ovisnost čovjeka o maslini, ali jednako tako i maslinika o ljudskom radu, rađaju zajednički plod, korišten i cijenjen tijekom čitave ljudske povijesti – maslinovo ulje.

### EXTRA VIRGIN OLIVE OIL

There are places and regions on which the passing of time, the human history and its span are particularly noticeable, close and ubiquitous. The island's precious rocks and soil are the place of scant but important universal and continuous values. The Island of Krk, because of its size and position, is a magical and unique combination of the mainland and the island. Preserved landscapes and forests, unique climatic conditions and pure soil and water enable you to enjoy a noble taste and features of true olive oil, ripened on arid, sunny and laborious land. This interconnection and dependence of a man and olive bring common fruit, used and valued throughout the human history – olive oil.

## SUŠENE VIŠNJE / SUŠENE RAJČICE

dobitnik  
oznake  
HOP 2010.

Sušenje voća vjerojatno je najstariji način čuvanja slatkih plodova prirode koji su nekada kao i danas sladili usta i vraćali energiju za rad i užitak. Višnja maraska dar je prirode, osušena čuva aromu i gušte za usta željna okusa i mirisa Dalmacije. Stara tradicija sušenja rajčica, gotovo zaboravljena, ponovno je oživljena i donosi na stol ljeti i zimi vrhunsku namirnicu i deliciju. Bez suhog *pomedora* nije bilo moguće skuhati "fažol i maništra na brujet" kao ni brojna druga viška i dalmatinska jela kojima je *pomedor* kao i luk (češnjak) osnova. Poljoprivredni obrt "Brojne" suši *pomedore* najbolje kvalitete, iz vlastitog povrtnjaka na otoku Visu koji se proizvode pod ekološkim nadzorom.

## DRIED SOUR CHERRIES / DRIED TOMATOES

Fruit drying is probably the oldest method of preserving sweet fruits of nature which have always been bringing delight to taste buds and energy for work and for pleasure. Marasca cherry is nature's gift, when dried it preserves the aroma and provides pleasure to those hungry for tastes and smells of Dalmatia.

The old, almost forgotten tradition of drying tomatoes has been revived and now brings a top-quality delicacy on the table, summer or winter. Without dried tomatoes (*pomedor*), traditional beans-and-pasta stew (*fažol i maništra na brujet*) could not have been made, nor other numerous foods of the Island of Vis and Dalmatia in general, in which tomato, just as garlic, is essential. Brojne agricultural products and services produce top-quality dried tomatoes from their own vegetable garden on the Island of Vis, by applying ecological methods of cultivation.

**PAŠKA MORSKA SOL**dobitnik  
oznake  
HOP 2010.

Prvi pisani podaci o solanama na Pagu postoje iz 9. st. Početkom 19. st. postojale su 133 male solane koje 1908. godine otkupljuje austro-ugarska vlast te je 1911. godine pustila u pogon modernu novu solanu. Solana Pag d.d. je 1980. godine sagradila tvornicu i time postala mješovita solarno termička solana. To znači da se dio proizvodnje odvija vani, u otvorenim bazenima, a dio u industrijskom postrojenju. Postupak proizvodnje morske soli počinje ugušćivanjem morske vode na vanjskim bazenima. More se ugušće pomoću sunca i vjetra. Ugušena morska voda, salamura, se pomoću pumpi ubacuje u tvornicu gdje se dodatnim zagrijavanjem vrši kristalizacija soli. Sol se potom centrifugira, jodira, suši i pakira ili se nejodirana pohranjuje u skladište za naknadno korištenje.

Solana Pag d.d. najveći je proizvođač morske soli u Hrvatskoj. Tehnologija proizvodnje u Solani Pag maksimalno koristi prirodne prednosti područja na kome se nalazi—čist okoliš, velik broj sunčanih dana, pogodan vjetar—pa paška sol svojom čistoćom spada među najkvalitetnije morske soli u Europi i svijetu. Sol proizvedena u Solani Pag sadrži niz minerala od kojih je većina nužna za ljudsko zdravlje, zbog čega je paška sol nezaobilazni dio svake zdrave prehrane.

**PAG SEA SALT**

The first written data on the Island of Pag saltworks date from the 9th century. In the early 19th century, there were 133 small saltworks which were bought in 1908 by Austria-Hungary authorities, which in 1911 released the new and modern saltworks into operation. In 1980, Solana Pag d.d. built its own factory and thereby became a combined solar thermal saltworks. This means that one part of production takes place outside, in outdoor pools, and the other in the industrial plant. The sea salt production process starts with condensation of sea-water in outdoor pools. The sea condenses on the sun and the wind. The condensed sea-water, brine, is pumped in the factory where additional heating causes crystallization of salt. The salt is then centrifuged, iodized, dried and packed, or it is stored without iodization in the warehouse for later use.

Solana Pag d.d. is the largest producer of sea salt in Croatia. Production technologies in Solana Pag use all natural advantages of the area—pure

## TRADICIONALNI CRESKI KOLAČIĆI (SALVIA BUCULIN, ROSETE, MEDENJAK BUCULIN, KACOTIN, MEDENJAK SMOKVA, VANILIN ČIFLET) / BRUŠTULANE MENDULE

Tradicionalni creski kolačići plod su truda i istraživanja starih recepata, rađeni ručno, usavršeni kroz struku, bez konzervansa i kao takvi dovedeni do cilja da se stari običaji ne ugase. Tako svečanosti nisu bile zamislive bez buculinama (prirodnog barometra) ukrašenog bademom. *Salvia buculin* proizveden je od meda svih medova – kadulje, izrazito aromatičnog okusa. Smokva medenjak hranjiva je poslastica. Čiflet je kolačić u obliku mjeseca na bazi oraha. Kacotini su od mendula (badema) a poslužuju se uz vino. Rozete u obliku ruže punjene su nadjevom od marmelade, kakaa i oraha. Mendule (badem) izvorno su voće rapskog arhipelaga. Stoljećima su naši preci bruštulane mendule imali kao najbolji bombon. Prigodan je za dekoraciju svečanog tanjura.

## TRADITIONAL CRES COOKIES (SALVIA BUCULIN, ROSETE, BUCULIN HONEY CAKE, KACOTIN, FIG HONEY CAKE, VANILLA ČIFLET / SUGARED ALMONDS – BRUŠTULANE MENDULE

Traditional Cres cookies are a result of effort and research of old recipes, hand-made, improved by professional knowledge, without preservative agents, and as such they accomplish the goal of keeping old customs alive. Old ceremonies were inconceivable without a *buculin* (natural barometer) decorated with almonds. *Salvia buculin* contains honey of all honeys – the sage honey, and has a very aromatic taste. Fig honey cake is a nutritious delicacy. Čiflet is a cookie in the shape of the Moon on a walnut base. *Kacotin* is an almond cookie which is served with wine. *Rosete* has a shape of a rose and is filled with marmalade, cocoa and walnuts. Almond (*mendula*) is an autochthonous fruit of the Rab archipelago. For centuries, our ancestors' favourite candies were sugared almonds (*bruštulane mendule*). It is great as a decoration of a festive plate.

## RAPSKA TORTA / SLASTICE (FINI MEDENJACI, KIFLICE ORAH, SVADBENI KOLAČ)

Rapska torta, najoriginalniji suvenir otoka Raba, prvi je put servirana 1177. godine i to Papi Aleksandru III prigodom blagoslova rapske katedrale. Od tada pa do danas postala je poznata i izvan granica Hrvatske. Rapska torta je delicija od badema, te je kao takva jedinstvena.

Fini medenjaci / kiflice orah / svadbeni kolači tradicionalni su kolačići otoka Raba. Za njihovu izradu koriste se samo najkvalitetnije sirovine (domaći badem, maslinovo ulje, domaći med od kadulje, klinčić,...). Dragocjenost medenjaka posebice u prošlim vremenima jest njihova dugotrajnost, pa su stoga pomorcima bili omiljena slastica. Različite vrste sitnih kolača koji su se pripremali za vjenčanja i danas se rade na isti način (medenjaci, kiflice orah, pita od oraha, pašta frola od badema, tablerone od čokolade, suhih smokava itd.).

## THE RAB CAKE / SWEETS (DELICIOUS HONEY CAKES, WALNUT ROLLS, WEDDING CAKES)

The Rab cake, the most authentic souvenir of the Island of Rab, was served for the first time in 1177 to the Pope Alexander III on the occasion of consecration of the Rab Cathedral. Ever since, the Rab cake is famous even outside Croatia. The Rab cake is a unique almond delicacy.

delicious honey cakes / walnut rolls / wedding cakes are traditional Rab sweets. Only the best ingredients are used for their preparation (local almond, olive oil, local sage honey, clove,...). Value of the honey cakes, especially in past times, was in their long life, so they were seafarers' favourite candy. Different types of small cakes which used to be prepared for weddings in the past are still prepared in the same way (honey cakes, walnut rolls, walnut pie, almond pašta frola, chocolate tablerone, dry figs etc.).

U obitelji Radovanović pčelarstvo je tradicija više od dvadeset godina pa od malih nogu postoji ljubav prema pčelama. Pčelinjak je stacioniran na južnom dijelu otoka Krka, na području Punta i Stare Baške. Na našem kršnom području sve ovisi o prirodi koja nije uvijek blagonaklona. Na otoku Krku samo je jedna paša i to kadulja. Predio gdje se nalazi pčelinjak oskudan je zemljom, samo krš, malo trave i kadulja gdje jedino ovce mogu opstati. Priroda je netaknuta i čista bez zagađivača.

## SAGE HONEY

The apiary is located on the southern part of Krk, in the areas of Punat and Stara Baška. The Radovanović family keeps the tradition of beekeeping for more than twenty years, so the family members nurture the love of bees from early childhood. In this karst area everything depends on nature, which is not always gracious. The only pastures on the Island of Krk are those of sage. The location of the apiary is scant in soil, there is only karst, some grass and sage, and the only animals are the sheep. Nature there is pristine and clean, without any pollutants.

## MED OD KADULJE

U netaknutim područjima otoka Krka obitelji okupljene u Udrugu pčelara "Kadulja" proizvode med od kadulje koji spada u sam vrh svjetske kvalitete. Sadrži mnogo eteričnog ulja koji mu daje karakterističan okus.

## SAGE HONEY

In unspoiled areas of the Island of Krk, the families which are members of the beekeepers Kadulja Association (*kadulja* is Croatian word for sage) produce sage honey of top world-class quality. It contains many essential oils which give it a characteristic taste.

Izvorni likovni umjetnik, pučki glazbenik i poljoprivredni proizvođač Ivica Tomičić Tajnikov od jedinstvene hvarske lavande proizveo je eterično ulje i suhi cvijet. Mikroklima i prirodni položaj čine hvarska lavandu najkvalitetnijom na svijetu. Dugogodišnja tradicija uzgoja i prerade lavande te prodaja u ručno oslikanim vrećicama, pridonijeli su prezentaciji lavande kao hvarskog simbola.

**LAVENDER ESSENTIAL OIL / LAVENDER FLOWERS**

An authentic visual artist, popular musician and agricultural producer, Mr. Ivica Tomičić Tajnikov uses the unique Hvar lavender to produce essential oil and dried flowers. A microclimate and geographical position makes the Hvar lavender the top-quality product worldwide. A long tradition of cultivation and treatment of lavender and its sale in manually painted bags contributed to its role as the symbol of Hvar.

### ŠKRAPPING INTERNATIONAL TREKKING RACE

Škrapping je jedinstvena internacionalna trekking utrka po oštrom otočkom kamenju i spada u vrstu ekstremnih sportova. Prvi Škrapping održan je 2006. godine na otoku Pašmanu, a idejni začetnik je gospodin Josip Tomić, atletski stručnjak. Nastavio se uspješno održavati na otoku Pašmanu. 2007. godine pod nazivom ŠKRAPPING 007, 2008. godine pod nazivom ŠKRAPPING EVOLUTION, 2009. godine Škrapping je imao izlet na otok Ugljan i održao se pod nazivom ŠKRAPPING NEW DIMENSION, a veliki odaziv se dogodio utrkom održanom 6. ožujka 2010. god. na otoku Pašmanu pod nazivom ŠKRAPPING PAŠMAN REVIVAL 2010. sa 400 natjecatelja iz Hrvatske i susjednih zemalja, te brojnim novinarima i gostima. Cilj Škrappinga je podizanje samopouzdanja i buđenje interesa otočana za sport, kao i upoznavanje javnosti s mogućnostima ljudskih i prirodnih resursa otoka Pašmana za organiziranje sportskih i kulturnih aktivnosti, u svrhu obogaćivanja turističke ponude posebno u zimskim, ali i svim drugim periodima.

Škrapping je postao otoku prozor u svijet i način na koji se otok može povezati sa svijetom.

### ŠKRAPPING INTERNATIONAL TREKKING RACE

Škrapping is a unique international trekking race on sharp island rocks and belongs to a category of extreme sports. The first Škrapping event was held in 2006 on the Island of Pašman, based on the idea of Mr. Josip Tomić, an expert in athletics. The event continued successfully on the Island of Pašman in the year 2007 under the name ŠKRAPPING 007, one year later it was organized as the ŠKRAPPING EVOLUTION and in 2009 it moved to the island Ugljan where it was known as the ŠKRAPPING NEW DIMENSION. On 6th March 2010 there was a large response to a race held on the Island of Pašman under the name ŠKRAPPING PAŠMAN REVIVAL 2010, with 400 competitors from Croatia and neighbouring countries, and numerous reporters and guests. The goal of Škrapping is building self-confidence and awakening interest of islanders in sports, as well as familiarising the public with the possibilities of human and natural resources of the Island of Pašman for organisation of sports and cultural activities, for the purpose of enrichment of tourist offer, especially during winter, but also during other seasons.

Škrapping became the Island's window into the world and a way for the Island to connect with the world.

## VRHUNSKO VINO FAROS / FAROS BARRIQUE / KVALITETNO VINO BOGDANUŠA

Faros / Faros barrique je vrhunsko crno suho vino s oznakom kontroliranog podrijetla koje se proizvodi od grožđa sorte plavac mali s južnih padina otoka Hvara, isključivo s položaja zvanih *Hvarske plaže*, oko i poviše mjesta Ivan Dolac. Predaja kaže da se na spomenutom području vinova loza uzgajala još prije 2.500 godina, u doba grčke kolonije Faros, po kojoj je vino i dobilo ime. Bogdanuša je kvalitetno bijelo vino s oznakom kontroliranog podrijetla koje se proizvodi od istoimene autohtone sorte grožđa s ograničenog starogradsko–jelšanskog polja u hvarske vino-gorju. Predaja kaže da se ovo vino, zbog izuzetne kvalitete, pilo za vjerskih blagdana (blagovalo Bogom dano vino) u čemu treba tražiti i korijene njegova naziva Bogdanuša.

### FAROS / FAROS BARRIQUE TOP - QUALITY WINE / BOGDANUŠA QUALITY WINE

*Faros / Faros barrique* is a top-quality AOC dry red wine produced from the grapes of the *Plavac Mali* variety growing along the southern slopes of the Island of Hvar, exclusively from the area called *Hvarske plaže*, surrounding the Ivan Dolac village. The legend says that in this area vine was cultivated as early as 2,500 years ago, during the time of the Greek colony of Pharos, which is how the wine got its name.

*Bogdanuša* is an AOC quality white wine produced from the same-named native grape variety from the limited Stari Grad–Jelsa location in the Hvar wine-growing area. The legend says that this wine, owing to its exceptional quality, was drunk on religious holidays—God-given (*bogomzano*) wine was enjoyed—which is where its name comes from.

## TRAVARICA S MEDOM I LJEKOVITIM I AROMATIČNIM BILJEM

Ova rakija proizvedena je od dvadesetak ljekovitih i aromatičnih trava ubranih na pelješkim vrhovima i dvije vrste autohtonog pelješkog meda, a spravljena je po recepturi iz 1750. godine. Njezina posebnost je u spoju ljekovitih trava i meda koji doprinose, ne samo ljekovitosti napitka, nego i bogatstvu arome kojom obiluje.

### HERB BRANDY (TRAVARICA) WITH HONEY AND MEDICINAL AND AROMATIC HERBS

This brandy is made of about twenty medicinal and aromatic herbs gathered from the Pelješac hilltops and two types of native Pelješac honey, based on a recipe dating back to the year 1750.

Its special quality lies in the combination of medicinal herbs and honey which contributes, not just to the medicinal properties of the drink, but also to the richness of its aroma.

**DJEVIČANSKO MASLINOVNO ULJE**dobitnik  
oznake  
HOP 2009.

Ulje postira dobiveno je iz maslina uzgojenih na sjevernoj obali Brača, obrađenih tradicionalno na hidrauličnoj presi (dijelom iz svježe ubranih plodova, a dijelom iz plodova koji su stajali u vodi nekoliko dana). Ugodnog je mirisa i okusa, žuto–zelene boje. Spoj tradicije, primjena novih saznanja u uzgoju i preradi te izuzetno povoljan mikroklimatski položaj koji stoljećima oblikuje krajolik, garancija je za dobivanje specifične i zdrave delicije.

**VIRGIN OLIVE OIL**

The "Postira" oil is obtained from olives cultivated on the north coast of the Island of Brač, processed in a traditional way by a hydraulic press (partly from freshly picked fruit, and partly from the fruit left in water for several days). It has a pleasant aroma and taste and yellow-green colour. The combination of tradition, application of new knowledge in the cultivation and processing, and the exceptionally favourable microclimatic position which has been forming the landscape for centuries, guarantee a characteristic and healthy delicacy product.

## LAVANDINO ULJE / LAVANDIN CVIJET / MEDOVAČA BRUŠKA / MEDOVAČA HVARANKA / MED RUŽMARIN / MED LAVANDA

Koncentrirana snaga mirisa i intenzivna ljubičasta boja nadaleko čuvene i jedinstvene hvarske lavande, očarava bojom i mirisom svojih cvjetova. Destilacijom se moć cvijeta pretvara u kapljicu eteričnog ulja.

Lavanda uzgojena na Hvaru, otoku koji je cijelu godinu u cvatnji, djeluje opuštajuće i ljekovito.

Tradicionalnim načinom pripreme obitelj Dulčić proizvela je liker od najkvalitetnijih sorti meda i ljekovitog bilja s ekološki čistih padina otoka Hvara kao i vrhunski med od ružmarina i lavande iz nedirnute prirode hvarske brežuljaka, blagotvornog i ljekovitog djelovanja na dišne puteve.

## LAVENDER OIL / LAVENDER FLOWER PRODUCTS / BRUŠKA HONEY BRANDY / HVARANKA HONEY BRANDY / ROSEMARY HONEY / LAVENDER HONEY

The strong scented and intense purple flower of the widely known and unique Hvar lavender is simply enchanting. Through the power of the distillation procedure this flower is transformed into a drop of essential oil.

Lavender cultivated on the Island of Hvar, where it is in bloom all year, has a relaxing and medicinal effect.

Using traditional methods, the Dulčić family produced a liqueur of the best honey and herb varieties from the unpolluted slopes of the Island of Hvar, and they also offer top quality rosemary and lavender honey from the pristine nature of the Hvar hillocks, which has a beneficial, medicinal effect on the respiratory tract.

Lustra brings back the magic of tradition into our homes. Their production is based on the sardine and the anchovy, and on almost forgotten processing techniques: marinating, salting and smoking.

Products are distinguished by their top quality, based on best raw materials and manual production, which preserves aromas, flavours and nutritional value of the most precious gifts of our sea.

Traditional processing methods are technologically supported by modern control techniques, but the greatest support actually comes from the hands of female workers who faithfully communicate the tradition of their ancestors.

### ULJE ZA TIJELO (LIMUN, GORKA NARANČA, LAVANDA)

Ulje za tijelo objedinjuje tri proizvoda u liniji. Bademovo ulje, kao osnovna komponenta sa značajnom koncentracijom vitamina, protuupalnim djelovanjem uz revitalizirajuća i regenerativna svojstva, sadrži dodatak kore brižno ubranih viških plodova limuna i gorce naranče, te eterično ulje lavande s Visa. Proizvod nanošenjem ispunjava energijom citrusa, osvježava i opušta. Potpuno je prirođen i ne izaziva alergijske reakcije. Testiran je na prijateljima.

### BODY OIL (LEMON, BITTER ORANGE, LAVENDER)

The body oil combines three products. Almond oil is the basic component with a considerable concentration of vitamins, an anti-inflammatory effect and revitalising and regenerative characteristics, with added peel of carefully picked Vis lemons and bitter oranges, and essential oil of the Vis lavender. The applied product fills you with energy of citrus fruit, refreshes and relaxes. It is completely natural and causes no allergic reactions. Tested on friends.

## VIŠKI GUC “POL ORIHA”

Puk je viškom gucu, brodiću dugom jedva 2,89 metara nadjenuo ime *Pol oriha* što u prijevodu znači *Orahova ljsuka* na koju svojim oblikom neodoljivo podsjeća. Izgrađen je 1936.g i po tipu je guc. Naziv guc pojavljuje se krajem 19.st i dolazi od talijanskog *baragozo*, *bragozzo*, *gocco*. Upotrebljava se za sitni priobalni ribolov, kao svićarica u ljetnom ribolovu ili kao pomoći ribarski brod. Guc je prvi brod koji se u Hrvatskoj počeo koristiti u svrhu sporta i razonode. Najpoznatiji su hvarski i pelješki guci. Na provi broda nalazi se unikatni mozaik inspiriran antičkim dupinom stare Isse, te kormilo falusoidnog oblika, rad akademskog kipara Matka Mijića.

## VIS GUC (OPEN FISHING BOAT) “POL ORIHA”

Common people have named THE VIS GUC, a small, hardly 2.89 meters long boat, *Pol Oriha*, which means *Nutshell*, as its form irresistibly reminds of one. This one was built in 1936 and belongs to the type called *guc*. The name *guc* appears near the end of the 19th century and comes from the Italian *baragozo*, *bragozzo*, *gocco*. It was used for small inshore fishing, summer fishing with lanterns or as an auxiliary fishing boat. *Guc* is the first boat in Croatia used for sports and pleasure. Best-known are the Hvar and the Pelješac *guc*. On the bow there is a unique mosaic inspired by the ancient dolphin of Issa, and a phallus-shaped rudder, work of the academic sculptor Matko Mijić.

## KVALITETNO VINO MUŠKARDIN / KVALITETNO VINO BUGAVA ROKI'S / DESERTNO VINO ROKI'S PROŠEK

Vugava, odnosno bugava kako je nazivaju na Visu, autohtona je sorta grožđa koja raste na plitkoj crljenici između kamenja. Bugava Roki's kvalitetno bijelo vino proizvedena je od ekološki ugojenog grožđa poznate viške sorte vugava. Bijelo suho vino Muškardin spoj je dvaju kultura koje ljubi isto more – talijanske i hrvatske. Proizvedeno je od viške sorte vugava i talijanske sorte trbljana. Uz viške cvite rado se pije desertno vino Roki's prošek proizведен od sorte plavac mali.

## MUŠKARDIN QUALITY WINE/BUGAVA ROKI'S QUALITY WINE/ ROKI'S PROŠEK DESSERT WINE

Vugava or Bugava, as they call it on the Island of Vis, is an indigenous variety of grapes which grows in the shallow red Mediterranean soil, between the rocks. The Bugava Roki's quality white wine is produced from ecologically cultivated grapes of the famous Vis variety of Vugava. The Muškardin white dry wine is a blend of two cultures kissed by the same sea – the Italian and the Croatian. It is produced from the Vis variety of Vugava and the Italian variety of Trbljan (Trebbiano). The traditional cookies Viški cviti go well with the Roki's Prošek dessert wine produced from the variety Plavac Mali.

### KVALITETNO VINO VUGAVA

dobitnik  
oznake  
HOP 2008.

Najstarija sorta na otoku Visu je vugava koja navodno vuče korijene još iz vremena grčke kolonizacije, kada se ta loza uzgajala na istim površinama kao danas. Vugava ili bugava vinogradarski je simbol otoka Visa, a sve karakteristike ove sorte slike su se u boci kvalitetnog vina Vugava.

### VUGAVA QUALITY WINE

The oldest variety on the Island of Vis is *Vugava*, whose history supposedly goes as far back as the period of Greek colonization, when this vine was cultivated in the same soils as today. *Vugava* or *Bugava* is a wine-growing symbol of the Island of Vis and all the distinguishing qualities of this variety have merged in the bottle of the *Vugava* quality wine.

### KVALITETNO VINO ŽLAHTINA / DESERTNO VINO NOA / PRIRODNO PJENUŠAVO VINO FRAJONA

dobitnik  
oznake  
HOP 2008.

Žlahtina je bijelo suho vino kontroliranog podrijetla, koje je mirisa dominantne cvjetne arome uz obilnu prisutnost zrelog voća. Vrlo je pitko zbog male doze alkohola, ali posjeduje solidan ekstrakt koji podržava nježni voćni karakter.

Proizvodi od žlahtine su i Noa dessertno vino te Frajona prirodno pjenušavo vino koje je na tržištu prisutno već deset godina. Ime vina žlahtina potječe od opčeslavenskog pridjeva žlahten, što znači plemenit.

### ŽLAHTINA QUALITY WINE / NOA DESSERT WINE / FRAJONA NATURAL SPARKLING WINE

Žlahtina is an AOC dry white wine. Bouquet is dominated by floral aromas combine with the abundant ripe fruit flavours. It is very drinkable, due to its low alcohol content, but it possesses good extract which supports the gentle fruity character.

Other products made of Žlahtina are the Noah dessert wine and the Frajona natural sparkling wine, which have been present on the market for ten years already. The name of wine, Žlahtina, comes from the old Slavic adjective žlahten, which means noble.

**VINO PLAVAC ANTUNOVIĆ / KVALITETNO VINO**

**RUKATAC ANTUNOVIĆ**

Postup svoje ime zahvaljuje čuvenim položajima poluotoka Pelješca. Na južnim padinama uz more plavac mali daje svoja najbolja vina, ako lozu njeguje dobar vinograda, a vino vješt podrumar.

Plavac Antunović proizveden je od istoimene sorte grožđa. Zahvaljujući pažljivoj njegi ovo vino posjeduje osebujan miris i okus, a sazrijevanje u hrastovini ga čini mekim i pitkim. Kvalitetno vino Rukatac Antunović je bijelo suho vino s kontroliranim podrijetlom proizvedeno od sorte grožđa maraština. Maraština se smatra autohtonom dalmatinskom sortom, iako je identična talijanskoj sorti Malvasia Lunga. Vino se prerađuje u vlastitom podrumu i po obiteljskoj tradiciji zrije u hrastovim bačvama.

**WINE**

The *Postup* wine owes its name to the famous location of the Pelješac Peninsula. The *Plavac Mali* variety growing on the southern slopes by the sea gives its best wines, if the vine is tended by a good winegrower, and the wine stored by an experienced cellarar.

The *Plavac Antunović* is produced from the same-named variety of grapes. As a result of thoughtful care, this wine possesses a unique bouquet and taste, and maturation in oak barrels makes it mild and drinkable.

The *Rukatac Antunović* quality wine is an AOC dry white wine, produced from the *Maraština* grape variety. *Maraština* is considered to be indigenous to Dalmatia, although it is identical to the Italian variety *Malvasia Lunga*. The wine is processed in the family cellar and matures in oak barrels according to family tradition.

### VRHUNSKO VINO PLAVAC / KVALITETNO VINO S KONTROLIRANIM ZEMLJOPISnim PODRIJETLom VUGAVA

Jedan od najboljih plavaca uspijeva na viškom vinogorju, odakle potječe i vrhunsko vino Plavac.

Vugava se odlikuje upečatljivom zlatnožutom bojom, posebnom aromom sorte, a po многимa ima raskošni medni okus i punoču. Zato se za nju često kaže da se više jede nego pije. Vugava je ranodozrijevajuća sorta pa najčešće s njezinim branjem počinje berba u Dalmaciji.

### PLAVAC SUPERIOR QUALITY WINE / VUGAVA QUALITY AOC WINE

One of the best varieties of the *Plavac* family does well in the Vis wine growing area, where this *Plavac* superior quality wine originates from.

*Vugava* is distinguished by the impressive golden-yellow colour, specific aroma of the variety, and, according to many, it has a luxurious honey taste and fullness. This is why people often say it is not drunk, but eaten. *Vugava* is an early-ripening variety, so that the harvesting of wine grapes in Dalmatia commonly starts with this variety.

### POGAČA OD SUHIH SMOKAVA VIŠKI HIB / KOLAČ OD MENDULA PANDULETE

HIB je viška delicija tradicionalne ručne izrade, harmonije okusa smokava, rakije i koromača, a miris lovora i ružmarina daju mu draž antičkih vremena. Njegova savršenost je u jednostavnom obliku, sastavu, principu konzerviranja, čuvanja i u njegovu okusu. Proizvodi se od smokava, aromatičnog bilja, badema i domaće rakije. Čuva se u suhom lоворovom i ružmarinovom lišću koji hibu daju dodatnu aromu.

Posebnost iskazuju i pandulete – tvrdi trajni kolač od badema koji se osobito dobro slaže s proškom.

### VIŠKI HIB SWEET BREAD WITH DRY FIGS / PANDULETE ALMOND CAKE

HIB is a traditional handmade delicacy from the Island of Vis, flavoured with a harmonious combination of tastes such as figs, brandy and anise, and the scent of bay leaves and rosemary providing it with the allure of ancient times. Its perfection lies in the simplicity of shape, ingredients, principle of preservation, manner of keeping and taste. Its basic ingredients are figs, aromatic plants, almonds and local brandy. It is kept in dry bay and rosemary leaves which provide hib with additional aroma.

No less distinctive is pandulete—a hard long-life cake made of almonds which is perfectly paired with sweet dessert wine such as *Prošek*.

## RABSKA TORTA / TRADICIONALNA RAPSKA SLASTICA MUŠTAĆONI

Rabska torta prvi put je poslužena, vjeruje se, 1177. godine. Originalni, tajni recept sa svim detaljima koje je potrebno znati za izradu ovog vrhunskog slastičarskog djela, znale su nonice i škrto ga prenosile dalje, pa je on danas poznat tek nekolicini njih koje ga izrađuju u rijetkim i svečanim prilikama. Ništa manje poznati su muštaćoni – tradicionalna rapska slastica koja zbog svog oblika muških brkova ima zanimljivo ime.

## THE RAB CAKE / MUŠTAĆONI TRADITIONAL RAB DESSERT

The legend says that the Rab cake, known as *Rapska torta*, was served for the first time in 1177. The original, secret recipe with all the ingredients necessary for making this excellent confectionary product, was kept jealously by the old island women who reluctantly passed it on to younger generations, so that today the recipe is known only to few women who prepare it on rare and festive occasions.

Equally famous are the *Muštaćoni* – traditional Rab cookies which obtained this interesting name due to their shape of male mustaches (tal. *Mostaccioli*).

## OSVJEŽIVAČI ZA KOŽU LICA I TIJELA – AROMATIZIRANO JADRANSKO MORE

Ova linija objedinjuje sedam proizvoda koji sadrže more uzeto iz akvatorija otoka Brača obogaćeno prirodnim eteričnim uljima biljaka s naših otoka i priobalja (lavanda s Hvara, kadulja s Paga, ružmarin s Brača, mandarina s Brijuna, bor s Kvarnera, lovor iz Dubrovnika). Koriste se kod umora, fizičkog napora ili u drugim prigodama jer morska voda blagotvorno djeluje na ljudsko tijelo, zdravlje i ljepotu budući da sadrži gotovo sve elemente iz prirode (mikroorganizmi, jod, mineralne soli, vitamini itd.).

### AROMATIZIRANO JADRANSKO MORE – FACIAL AND BODY SKIN FRESHENERS

The products under the collective name of *Aromatizirano Jadranško more* (eng. Aromatic Adriatic) comprise facial and body skin fresheners which combine seven products per line. They contain sea from the maritime zone of the Island of Brač, which is rich in natural essential plant oils from our islands and coastal areas (lavender from the Island of Hvar, sage from the Island of Pag, rosemary from the Island of Brač, mandarin from the Islands of Brijuni, pine from Kvarner, bay from Dubrovnik). They should be used in case of fatigue, physical strain etc. because sea-water is beneficial to human body, health and beauty, as it contains almost all natural elements (microorganisms, iodine, mineral salts, vitamins, etc.).

### SUVENIRI OD BRAČKOG KAMENA (MUŽAR / SVIJEĆNJAK / ZDJELICA)

Upotreba autohtonog bračkog mramora kao osnovnog materijala za izradu suvenira i uporabnih predmeta najveća je vrijednost ovog assortimenta. Skupina uporabnih predmeta izrađenih iz visoko obrađenog mramora (mužar, svijećnjak i zdjelica) predmeti su koji pokazuju estetsku i uporabnu vrijednost.

### BRAČ STONE SOUVENIRS (MORTAR / CANDLESTICK / SMALL DISH)

The use of the indigenous Brač marble as the base material for the creation of souvenirs and usable items is the greatest value of this range. The usable items made of highly worked marble—a mortar, a candlestick and a small dish—have both aesthetic and usage value.

### CRVENKAPA / POMIDORIĆ

Kape su ukrašene karakterističnim crnim sviljenim i pamučnim vezom (*motiv na sunače*).

Crvenkapa šibenskog tipa nosi se na šibenskom području, ali i na otocima šibenskog akvatorija.

Pomidorić se nosi od Raba do Lastova. Izrađuje se u čohi od narančaste do tamno crvene boje.

### CRVENKAPA / POMIDORIĆ

*Crvenkapa* (of the Šibenik type) is a traditional cap worn in the area around Šibenik, but also on the islands near Šibenik.

*Pomidorić* is a traditional cap worn in the whole area from the Island of Rab to the Island of Lastovo. It is made of a coarse peasant cloth which can be orange to dark red in colour.

Caps are decorated with characteristic black silk and cotton embroidery (with a traditional motif called *na sunače*).

## PROIZVODI OD CRESKE VUNE

dobitnik  
oznake  
HOP 2008.

Linija proizvoda od creske vune (papuče, ulošci za obuću, šešir, jastuk, prsluk, ovčice) nastala je korištenjem tradicionalnog otočnog materijala – valjane vune. Vuna se nakon češljanja moči vodom i sapunom, a zatim gnjeći i valja pri čemu se vlakna sve čvršće međusobno isprepliću. Rezultat je gusti i neraskidivi materijal filc ili pust. Filcanjem se oblikuje gruba vuna creske pramenke.

## WOOL PRODUCTS FROM THE ISLAND OF CRES

A line of the Cres wool products (slippers, insoles, hats, pillows, vests, sheep folly) emerged through the use of traditional island material – carded wool. After combing, the wool is soaked in water and soap, and then pressed and carded to make the fibres tightly intertwined. The result is a dense and untearable material called felt. Felting is used for processing of coarse wool of pramenka sheep breed from the Island of Cres.

The olive varieties are mixed in varying proportions, which gives the oil its distinctive smooth, full-bodied taste, light aroma of fresh olives and rich golden colour. *Marco Polo* extra virgin olive oil is intensely fruity with moderate bitterness and a great strength of flavour. The *Lastovka* variety accounts for the greatest volume of olives used, because it is rich in antioxidants (known as polyphenols), which safeguard the oil from the phenomena of self-oxidation which causes the ageing and rapid degradation of the characteristics of the oil, and which significantly affects the quality of olive oil.

**PAG CHEESE**

PAG CHEESE is exclusively made from sheep milk of the domestic indigenous breed of Pag's sheep and its production is seasonal in character. The mature Pag cheese between 6 and 12 months of age has a characteristic spicy flavour, distinctive smell and somewhat marble-like and granular pastry texture. Once inside the mouth, it crumbles and melts. In its grated form, Pag cheese is added to many domestic fish and meat specialties. It comes in the form of a wheel weighing about two kilos, with gold yellow rind. Today about thirty five thousand sheep are bred on the island of Pag. About three hundred tons of Pag cheese are produced per year throughout the island, which is also the island's top production rate as its most valuable resource – pasture grounds – is quite limited. This makes Pag cheese a limited series product and top quality one, which can only be found on the tables of true gourmands.

**PAŠKI BAŠKOTIN**

Baškotin je posebna vrsta tvrdoga peciva, a recept za taj specijalitet nikada nije izašao iz zidina staroga samostana. Receptura i izrada baškotina prenose se s generacije na generaciju sestara. To je naš tradicionalni proizvod od kojega je samostan uvek imao skroman prihod. Proizvodi se ručno i sestre ga rade s ljubavlju. Baškotin je okus baštine Paga koji vole mladi, kao što su ga voljeli njihovi očevi i majke, djedovi i bake.

**PAG BISCUIT**

Baškotin is a special type of hard pastry and the recipe for this specialty has never left the walls of the old convent. The recipe as well as the making of the baškotin is being handed over from generation of nuns to the next. It is one of our traditional products which always assured the convent a modest income. This pastry is being made by hand and with an immense amount of love. Baškotin contains the taste of the Pag tradition so much appreciated by the younger generation, as did their parents and grandparents.

## PAŠKA ČIPKA

dobitnik  
oznake  
HOP 2007.

Paška čipka, šivana iglom, svoje polazište nalazi među tekovinama tektstilnog rukotvorstva istočnog Mediterana. Sa sigurnošću možemo reći da se kvalitetom ravnopravno nosi s čipkarskim proizvodima susjednih zemalja istoga kulturnoga kruga, a svojim se osobitostima od njih i razlikuje. Izrađuje se u gradu Pagu i do danas je sačuvana u izvornom obliku. Svojom se originalnošću razlikuje od ostalih čipki šivanih iglom ili batićima.

## LACE OF PAG

Lace from the town of Pag, made with darning - needles, has its origins in the achievements of the textile handicrafts of the eastern Mediterranean. We may be certain that this lace, because of its quality, deserves to be treated similarly to other lace products from neighbouring countries. It should be added that Pag lace stands out because of its special features. The lace in its original form is still preserved today. Because of its originality, this lace differs from other laces made with needles or clappers.

## BRAČ FINI SAPUNI

Brač fini sapuni ručno su rađeni i rezani, stoga je svaki sapun unikatan. Sapuni su deklarirano potpuno prirodni i bez ikakvoga konzervansa. Sadrže isključivo ulja biljnog podrijetla. Eterična ulja svakom sapunu daju specifična ljekovita svojstva i miris biljaka od kojih su dobivena. Sapuni su autentičan hrvatski suvenir i dobar kozmetički proizvod za njegu lica i tijela.

## BRAČ FINE SOAPS

All soaps are manufactured and cut by hand – and therefore unique. Their natural origin and absence of any preservatives are declared on the label. Essential oils endow each soap with specific medicinal properties and with the fragrance of herbs they are made from. The soaps are authentic Croatian souvenirs and good beauty products for facial and body care.
