

USPOSTAVA HRVATSKOG SUSTAVA NADZORA I UPRAVLJANJA POMORSKIM PROMETOM

ESTABLISHMENT OF THE CROATIAN VESSEL TRAFFIC MONITORING AND INFORMATION SYSTEM

**REPUBLIC OF CROATIA
MINISTRY OF SEA, TRANSPORT AND INFRASTRUCTURE
Maritime Transport, Maritime Domain and Ports Directorate
Capt Mario Babić, assistant minister**

Zagreb, 8 April 2008

WHAT IS VESSEL TRAFFIC MONITORING AND INFORMATION SYSTEM ?

VTMIS is a complex telematic and IT system as well as organizational and legal setup established with the aim of:

- efficient management and monitoring of maritime traffic,
 - raising safety of life at sea (reduction of casualties),
 - improving efficiency of search and rescue operations at sea,
 - contributing to prevention and detection of pollution from ships,
 - enabling exchange of information on national, regional and EU level (e.g. SafeSeaNet)
 - improvement of investigation of maritime accidents and pollution incidents,
 - facilitating more efficient maritime transport services
- 
-

BACKGROUND

The establishment of the Vessel Traffic Monitoring and Information Systems (VTMIS) is conceived and based on the:

- Commission White Paper on the European transport policy
 - Directive 2002/59/EC establishing a Community vessel traffic monitoring and information system
 - Chapter V of the SOLAS Convention
 - IALA Guidelines and recommendations
 - Pre-accession Maritime Transport Strategy of the Republic of Croatia (2005)
 - VTMIS Development Strategy (2005)
-

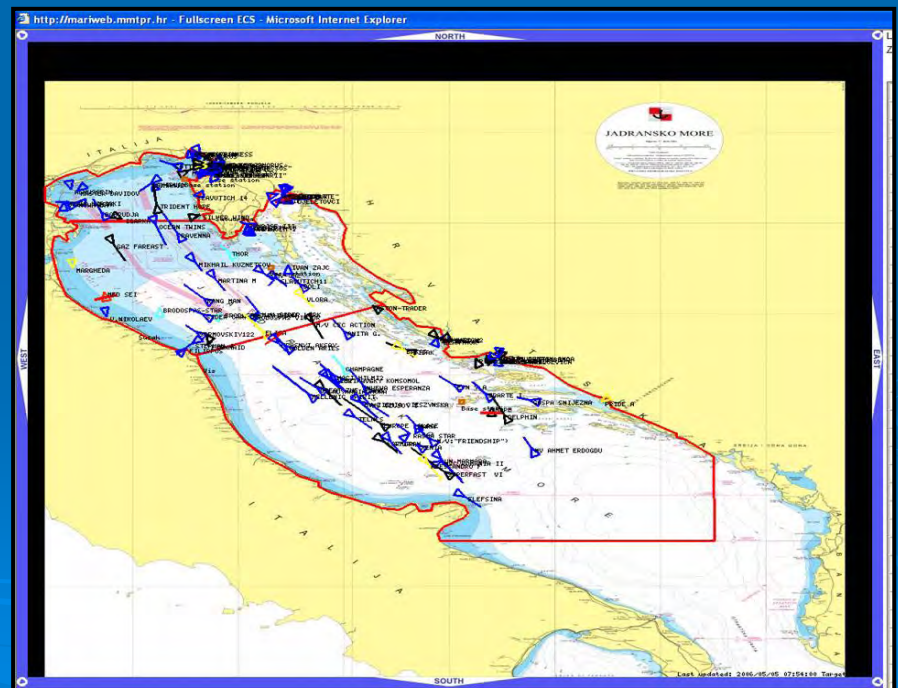

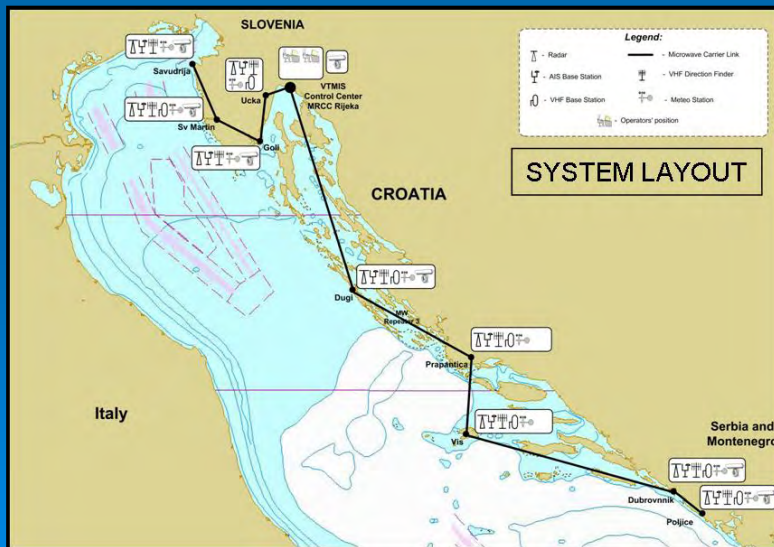

BACKGROUND IN NUMBERS

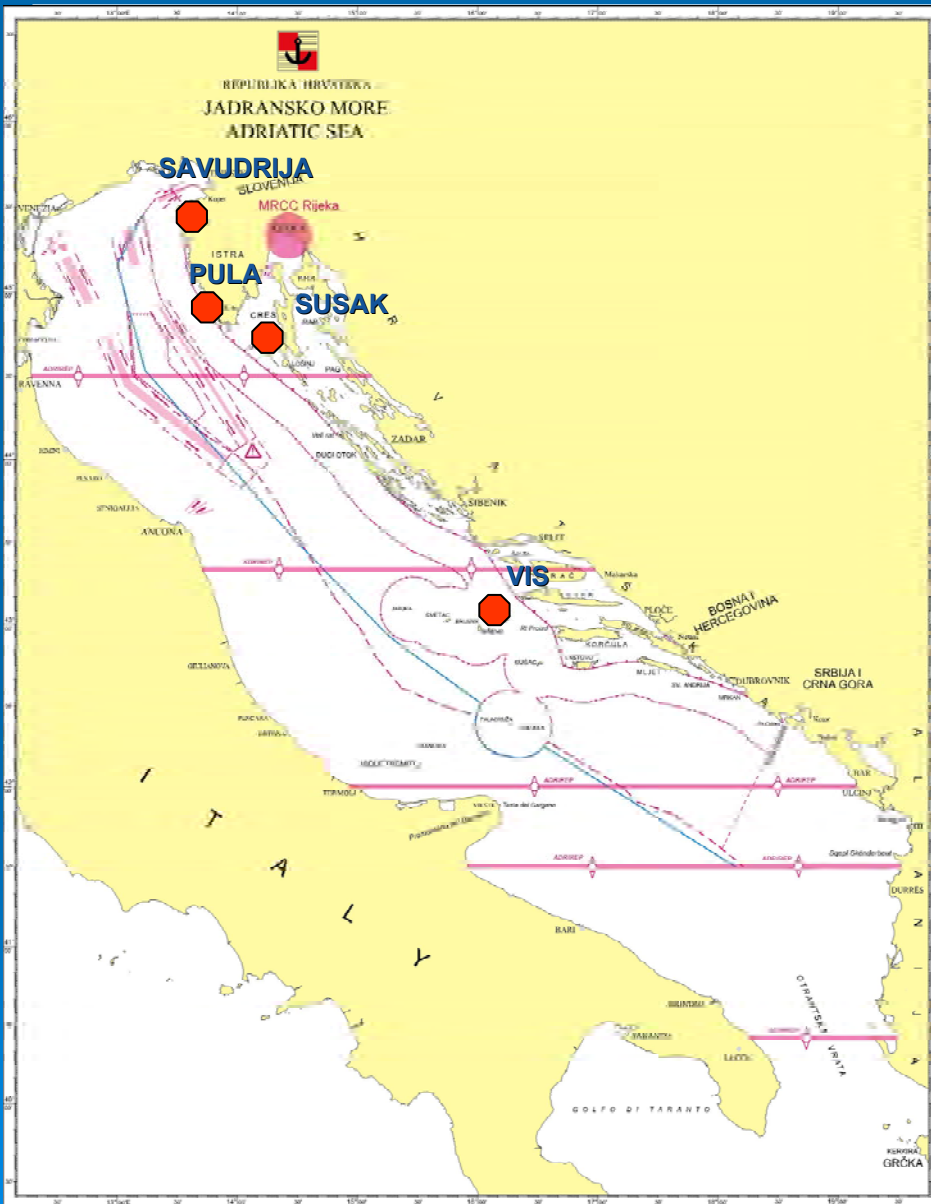

- average **7000** ships in international trade call at Croatian ports
 - **539** yachts and **103.945** boats registered in Croatia
 - During year Croatia visited by **54000** foreign yachts
 - average **7000** HAZMAT ships pass through Adriatic sea every year en route to Croatian and Slovenian Ports
 - average **300** search and rescue operations performed in Croatia every year
 - cca **70 million** tons of oil carried by ships through Adriatic sea every year
 - average **90** Paris MoU's Black list ships enter Croatian ports
 - In last 15 years **174** larger maritime accidents reported (m/v „Cavtat; m/v „Brigitta Montanari)
 - total average quantity of oil spilled every year in the Adriatic would form a **1228** square km oil slick
 - sea passage from Otranto to Port of Trieste is **460 NM** long and the maritime traffic through this area is dense
-

TECHNICAL ASPECTS OF VTMISS

VTMISS consists of at least:

- Automatic Identification of Ships System
- Maritime Radar System
- Maritime Radio-communications System
- Information system

EXISTING MEASURES AND SYSTEMS

- MRCC – Rijeka
- Ships Reporting System in the Adriatic (ADRIREP)
- Traffic Separation Scheme Northern Adriatic
- AIS:
 - 2 BS operational in 2005 : Mid Adriatic (Vis Island), West Coast of Istria (Savudrija)
 - 2 BS operational in 2006: West Coast of Istria (Pula) and and Island Susak
- MoU Republic of Croatia and Italian Republic for the establishment of a Common Vessel Traffic Service in the Adriatic Sea, Ancona 19 May 2000.

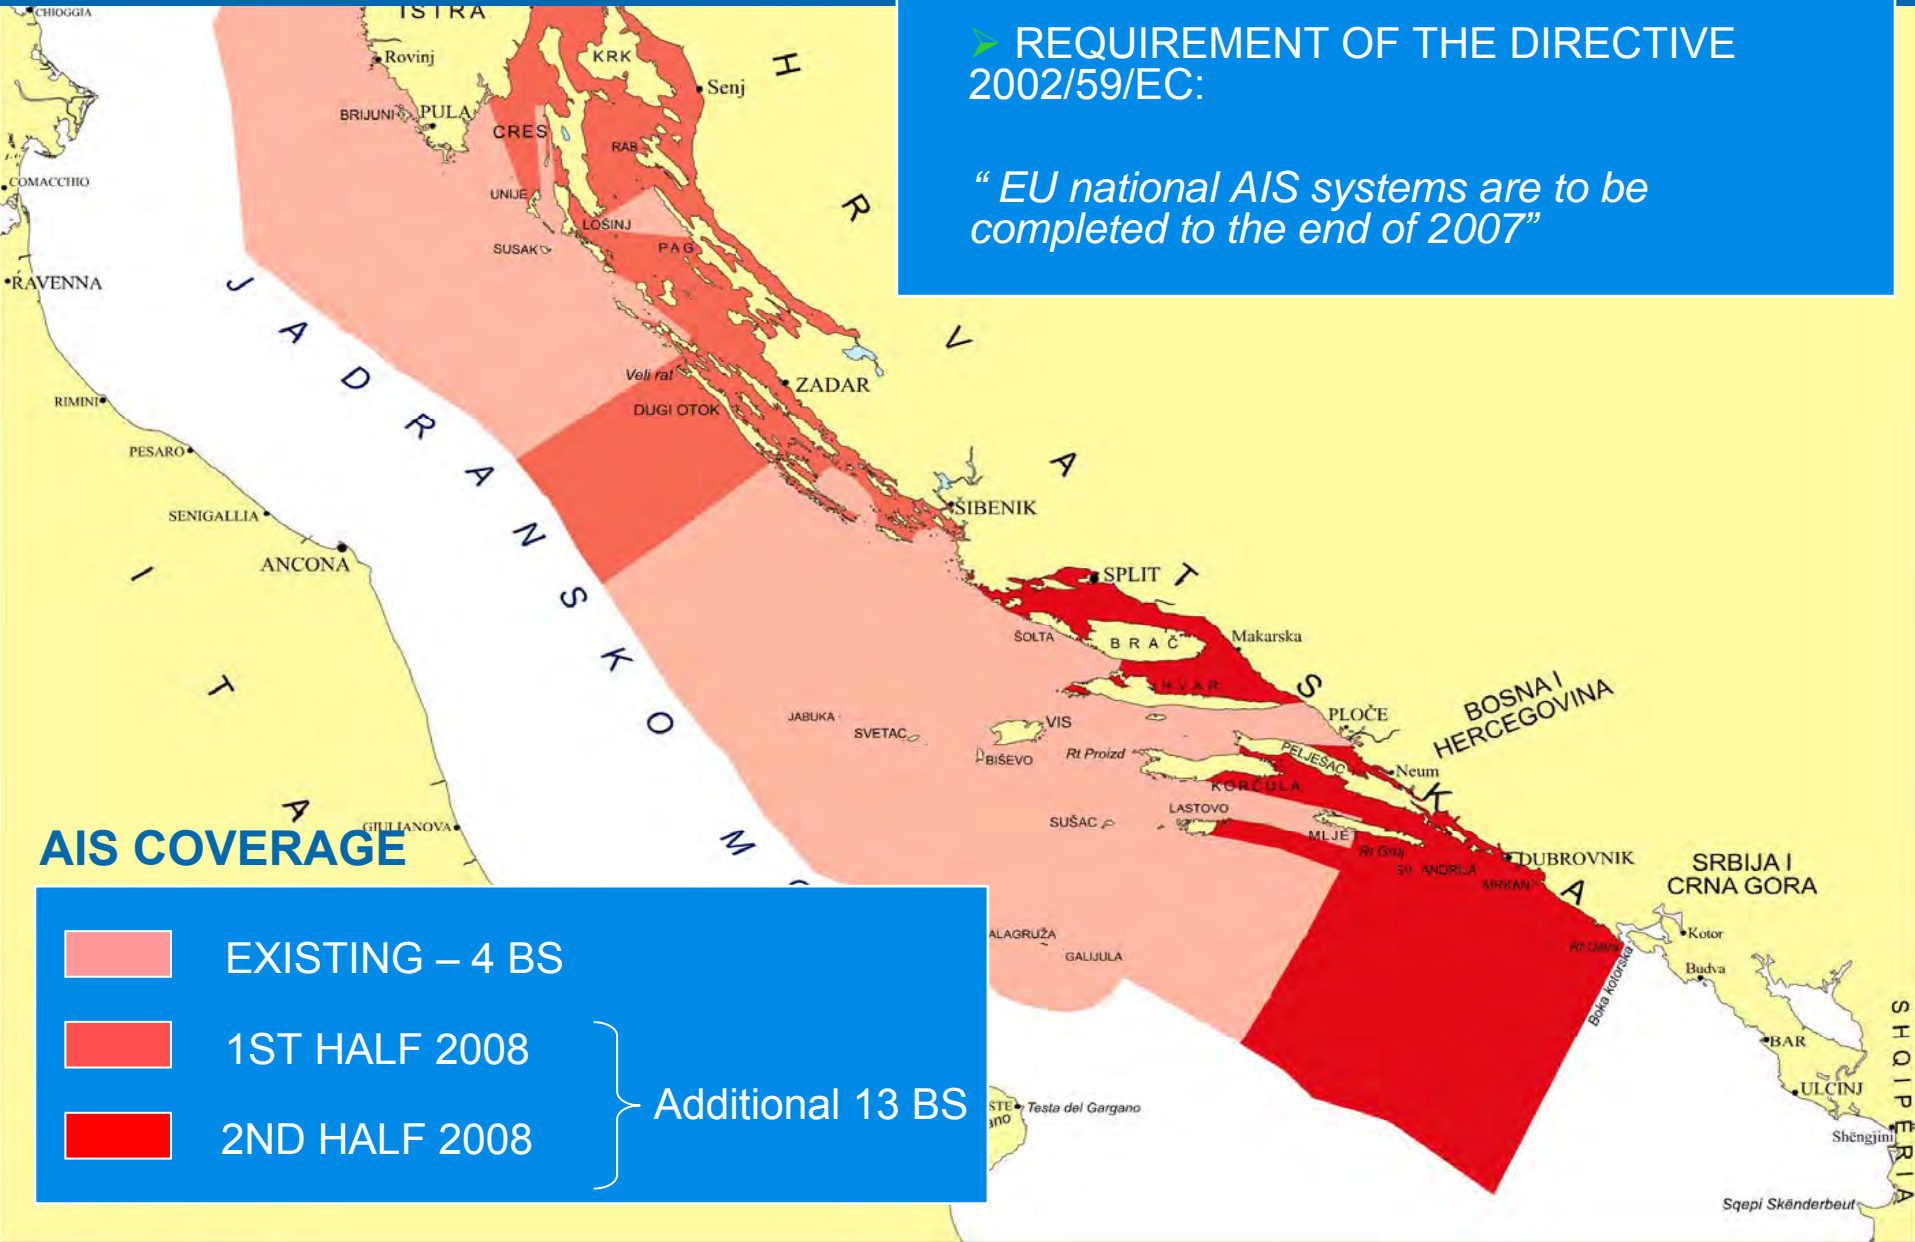

AUTOMATIC IDENTIFICATION OF SHIPS SYSTEM (AIS)

➤ REQUIREMENT OF THE DIRECTIVE 2002/59/EC:

“EU national AIS systems are to be completed to the end of 2007”

AIS COVERAGE

- EXISTING – 4 BS
 - 1ST HALF 2008
 - 2ND HALF 2008
- } Additional 13 BS

LEGAL ACTIVITIES RELATED TO IMPLEMENTATION OF AIS

Harmonization with Directive 2002/59/EC in 2007:

- new Technical Rules → stipulate the obligations for fitting of all Croatian ships with AIS
 - new Ordinance on the conditions and method of maintaining order in ports and on other parts of internal waters and the territorial sea of the Republic of Croatia → obligations for ships calling at Croatian ports to be fitted with AIS
- 
-

Project “Maritime safety: Enforcement of administrative capacity - monitoring and management of vessels- PHASE I “

PROJECT PURPOSE

Enhancement of administrative and technical efficiency of Maritime Administration in monitoring and management of vessels with a special regard to vessels carrying dangerous and polluting goods.

FINANCING

- PHARE 2005: 1 million Eur EU financing

DURATION: 2006- 2009

CURRENT ACTIVITIES IN PHARE 2005:

- INSTITUTIONAL CAPACITY BUILDING
 - FINLAND-ITALY-CROATIA Twinning Project
 - Contract value: 600.000 Eur

- INTEGRAL CROATIAN VESEL TRAFFIC MONITORING AND INFORMATION SYSTEM STUDY
 - consortium THETIS spa- Rina Industry- D’Appolonia
 - Contract value: 386.000 Eur

Project “Maritime safety: Enforcement of administrative capacity - monitoring and management of vessels- PHASE II“

PROJECT PURPOSE

Enhancement of administrative and technical efficiency of Maritime Administration in monitoring and management of vessels with a special regard to vessels carrying dangerous and polluting goods.

FINANCING

- PHARE 2006:
 - EU co-financing : 5,4 million Eur
 - National co-financing: 1,5 million Eur
 - TOTAL: 6,9 million Eur**

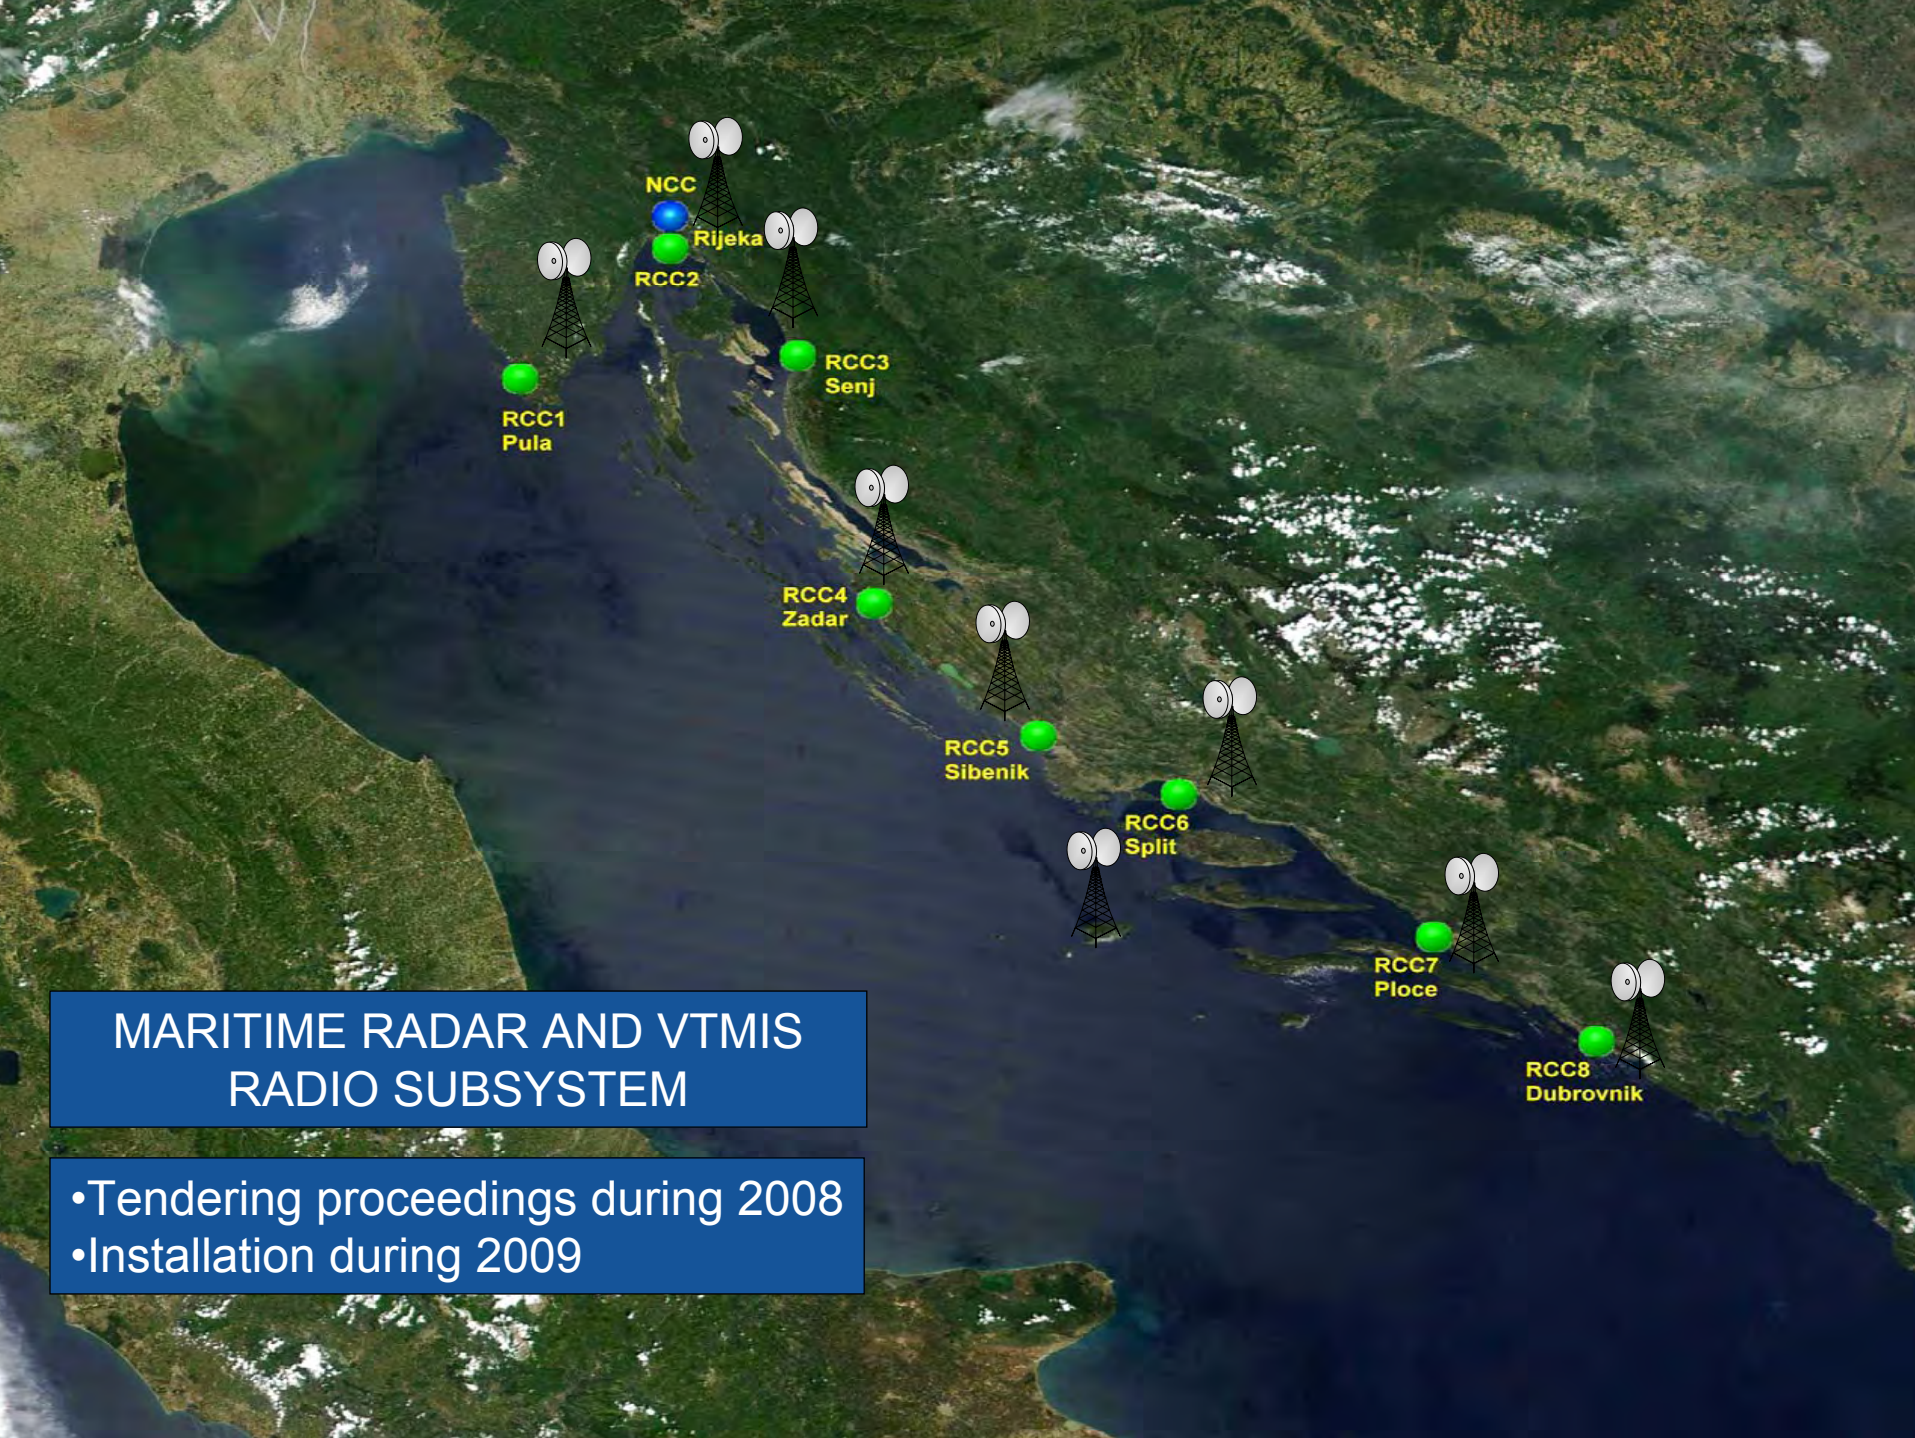

DURATION: 2007- 2010

ACTIVITIES :

- INSTALLATION OF MARITIME RADAR AND OTHER VTMIS EQUIPMENT
- INSTITUTIONAL CAPACITY BUILDING → TWINNING
 - Education and training of VTMIS Operators
 - Study visits to VTMIS resources and competent authorities of EU Member State including simulator training
 - Administrative capacity building for the Flag State Implementation
- TA FOR PROJECT IMPLEMENTATION

CURRENT STATUS: TENDERING PROCEEDINGS UNDERWAY!

MARITIME RADAR AND VTMIS RADIO SUBSYSTEM

- Tendering proceedings during 2008
- Installation during 2009

TWINNING

FINNISH MARITIME ADMINISTRATION- ITALIAN COAST GUARD

Twinning project is conceived to provide transfer of knowledge and technical assistance in development of the Croatian Vessel Traffic Monitoring and Information Services

Thank you !

The bottom half of the slide features several concentric circular ripples of varying sizes, rendered in a lighter shade of blue than the background. These ripples are positioned in the lower right and bottom center areas, creating a subtle, artistic pattern.
